Beep Beep! ROAD RUNNER PURSUED

WIN A 64C
WIN A SKATEBOARD

REVIEWED
EAGLES - SPACED OUT!
NEMESIS - TERMINATED!
WIZBALL - PSYCHEDELIC!
BARBARIAN - GUTWRENCHING!
From ATARI™
THE WORLD’S MOST FOREMOST
COIN-OP MANUFACTURER COMES
THE WORLD’S FOREMOST
ARCADE GAME
"PAPERBOY"

ON SALE
FOR THE C16
FROM MAY 25th
GET READY!
26 ROAD RUNNER
Eugene Lacey hops on his ACME skateboard in an attempt to nail the Road Runner once and for all. Instead he gets a preview of the Atari game. That's not all folks there's a competition too.

74 INTO THE VALLEY
Keith Campbell dons his lab coat and gets to grips with Mary Shelley's gothic tale, Frankenstein. There's a bit of sleuthing to be done too with Where in the World is Carmen San Diego? and The Big Sleeze.

90 ARCADES
Nick Kelly straddles Sega's Super Hang-On, the bigger and better version of the one currently in your local arcade. Plus there's more racing with a dash of shooting to be done in Atari's Roadblasters. Over the page the team play a top of the table clash with Taito's Kick and Run. Previews of the Summer's big releases await you as well.

4 LETTERS
Commodore User play Zzap at cricket, someone cancels their advertising, you back us up over S. Africa (well one of you doesn't) and a reader writes in distress at the impending demise of his marriage. CU's agony Uncles answer all.

10 BUZZ
Your usual batch of exciting previews in colour, plus the latest news from the world of the Commodore. But what the hell are the Beastie boys doing there? Five pages of up-to-the-minute info.

70 RESULTS
Who won what in the Amiga, Meet the Team, FA Cup, Minter and Burger compos — held over from last month. Are you the lucky winner?

80 TRIED AND TESTED
Bohdan Buciaż, desktop publishing entrepreneur talked Rainbird into revamping their Art Studio now he gives his verdict on the new version.

98 HOT SHOTS
It gets worse and worse. Why do we print such rubbish? Well, apparently you love it.

If you are sick and tired of having the general election rammed down your neck every time you pick up a magazine I have some good news for you — this CU is guaranteed Thatcher, Kinnock, Owen and Steel proof. Instead it is crammed with scoop game reviews. You'll already have found our Play to Win IV booklet free on the front cover. I am pleased to be able to give you this super free gift without increasing our cover price by 50p. Arcades is crammed with new game previews that are sure to end up on the 64 before long. Hot reviews of the utterly groovy Wizball and Barbarian puts CU right out in front in the 'getting you the stories first' department as always. It's a great start to the Summer.

The Ed.
**Letters**

**Going down a storm**

- After reading Kan "The King" McMahon's rave C64 review of "Storm" I rushed out and bought a copy. I was not disappointed, it was très bien. But now for the complaint, why did Mike "the Prat" Pattenden give the C64 version a very average mark whilst it is almost identical to the C16 version which King Ken gave a great mark to? Quibbles apart though C.U. is a real piece of class so make this the star letter or I'll bring Storm and the guys to sort you out.

-Darren Forrest, Midlothian, Scotland.

The C16 is not as smart as the C64 therefore many games produced on it are not as good. Fact. Storm C16 was very similar to Storm C64 which means the latter could have been better (sound, speed etc.) Mike says you are out of order and a complete wally. Does anybody want to cancel their advertising because we said this.

**Idiot**

- I am writing in response to a letter that appeared on the letters page of CU dated April 1987, from Hamidun Majid. He must say that I was greatly angered by the contents of that letter, to write in to complain about a logo used perfectly innocently, is to put it mildly, sickening. I shall be greatly disappointed if ever you consent to the whims of a pathetic idiot. As for Hamidun, I believe he is reading the wrong magazine, in his letter he says C-VG does not use type of logo any more, maybe he should read the rest and you get 25.

- I think I made it very clear in my letter that I was not putting in a complaint against any other magazine. I was specifically talking about C-VG.

-Kristen Bullet, Huddersfield.

Excuse us but there were sixteen colour reviews in April. Add the rest and you get 25.

**Wrong**

- There are not enough colour reviews in "Commodore User". The May edition of "Zzap" had 23 reviews and 13 colour pages. (I only know because my cousin gets it). But the April edition of "Commodore User" has 32 reviews and only 9 colour pages. RIP OFF! Can't you do any better?

- Kristan Bullet, Huddersfield.

**Divvy decision**

- It is with great interest I read your latest comments to "your readers" in the letters page. I say "your readers" because after April's issue I am sure a few of them have taken the trouble to write to you, to be buying other magazines. I can only assume that the title of Editor makes you automatically assume you have the right to reply to kids like this.

- So on behalf of the young lad whose dad you called a divvy, I am cancelling two advertisements placed with you for June and July issues.

- Debbie J Stillitoe, Sales and Marketing Manager.

**Right on!**

- I have just been reading through the letters in your April edition, and I just had to write and make this point.

- I really stand with you on your decision of not distributing to S.A., and wish a lot more people would take a similar point of view (we own so called "liberated Government"), against the dictatorial and racist policies purported in S.Africa.

- I also liked the way you put down the angry Asian for his anti-Semitism, but then you contradict yourself by saying that you welcome readers regardless of race, creed, colour, etc.

- After your scathing answer to the S.African? I think somebody down there is spooked with the forked tongue. Tut-Tut C.U.

- Jack Diamond, Ayr, Scotland.

**Speccy owner**

- I am writing to tell you how good your magazine is in comparison to those awful C64's you have to cater for.

- Programming is reduced to POKE's and the graphics are either blocky or flickering.

- Mind you, the Commodore Amiga is pretty good though, but personally I wouldn't go anywhere near anything else with commodore marked on it. By the way, I own a Spectrum Plus.

**Vegemite Sandwiches**

- I'm a 15-year-old Australian who enjoys surfing, skateboarding, using Ye Olde 64 and reading your magazine, and I would love to swap letters, tips, hints and programs with anyone in England (or around the world).

- Also while I am writing I'd like to say your magazine is hot, West...
Ham will win the F.A. Cup soon. Software in Australia is too expensive. Iris Alpha is a super bargain. Ian Botham is the only good cricketer in England and Margaret Thatcher is a man in disguise. If anyone is interested then send a list of your games to: Ross Piper, 19 Rose Avenue, Victoria, Australia. You're right on West Ham, software in Oz. Iris Alpha and Maggie but let's face it you were whooped by a team of goons. What about Chris Broad, Graham Dilly, Phillip De Freitas and John Emburey? It's you lot that have got one player. His name is Alan Border.

**Sympathy**

As an Amiga owner your review of Sibad was received excellently by me. I think it would be a good idea to have an Amiga section with news and reviews about Amiga software (and could possibly include the Atari ST).

My only gripe is about the way you answer readers letters. Saying things like 'you must like watching grass grow' is just not good enough.

You must be more sympathetic to other people's points of view on matters. You must explain that what you print in a review is just the personal opinion of the reviewer.

One thing I really liked was the way you answered the letter from South Africa (April 87). Well done.

Apart from my one gripe your magazine is a good one. Keep up the good work.

D. W. Norman
Chiswick
London W.4.

Surely you can't expect us to behave intelligently and respond to criticism properly. That would be plain dull and far too reasonable. But you can count on more Amiga coverage.

**Over there**

I am writing from America and I wanted to address a few points to you and your readers in England.

First off, your magazine is excellent; there are no computer/software magazines in the U.S.A. that even come close. I consider myself fortunate to find a copy each month at a local software store. Those of your readers who find faults with CU should have their heads examined.

I often read your letters section and I notice a fair amount of complaints levelled at various English software releases. Heck, your readers should count themselves lucky that they at least have software to criticize.

Here in the U.S. the software (games) industry is in sad shape. There was a time not too long ago when one could walk into any software shop and find plenty of new and interesting games. But that isn't the case anymore and many of us feel really are starved for software. I used to be able to buy a quality new game at least once or twice every few weeks. Now it looks like once every month or two is about right.

One more thing about U.S. software: the words 'arcade conversions' do not exist in their vocabulary. Of my sixty or so titles, only 'Marble Madness' and 'Russian Attack' were ever in the arcades. I guess I'd rather see a flight on the Concorde if I ever want to use Gauntlet, Paperboy, Dragon's Lair, or any other arcade title.

So the next time a reader wants to gripe about 'that bug' or 'the music stinks', let him or she remember us Americans who can't even see a game to complain about. And to all the English software houses, I beg of you, 'Start sending some games our way!'

Jeff Marx
Ench, California

**Wind**

I would like to praise you (no, this isn't another creepy letter) on the reply to B. Robinson's letter. No other magazine has the guts to talk about politics.

Anyway, when the letters section was a twinkle in Eugene's eye it was called Feedback (ask your Grandad, he'll know) and weighed just one page. Since then he's grown, got christened Letters, and put on so much weight that in the last weigh-in he totted up four pages. But now he's so fat he's got wind which usually comes out as "CU is deteriorating drastically and I'm subscribing to Zzap!" or "CU I love you, please, marry me!". Either way wind stinks so replace it with pictures of Uncle Jim to reassure us of his safety.

Chris Cousineau
Taunton, Somerset.

PS. If someone doesn't like the word 'crap' in the mag, he's boring.

**Howzat!**

I read Commodore User and Zzap! 64 regularly. I'm not sure which magazine I liked better. So I came up with a "different" way to separate the two. I decided to enter the staff from each magazine and played Graham Gooch's Cricket with the two teams. I now know which magazine to read. Here are my results:

**Howzat!**

<table>
<thead>
<tr>
<th>Magazine</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commodore User 1st Innings</td>
<td>233</td>
</tr>
<tr>
<td>Zzap! 64 1st Innings</td>
<td>222</td>
</tr>
<tr>
<td>Commodore User 2nd Innings</td>
<td>445</td>
</tr>
<tr>
<td>Zzap! 64 2nd Innings</td>
<td>189</td>
</tr>
<tr>
<td>Commodore User won by 267 runs!</td>
<td></td>
</tr>
</tbody>
</table>

**Sid the sexist**

There's one thing wrong with your magazine, and that's girls. The fact is that there very rarely mentioned, especially in the letters department. Is this because they haven't learnt to write yet or aren't there any computer freak girls out there.

So that you don't have to strain your rusty old brains on how to get more girls into the mag. I will save you the bother and suggest that you have a page 3 like the Sun.

**Letters**

I would like to give you a list of girls you can use. By the way I just thought that I would tell you that your mag's great.

Gary Scott
Petersborough

We think it would be nice to have more female participation but not in the way you want! After all girls just wanna have fun too.

Letters, Commodore User, Priory Court, 30-32 Farringdon Lane, London EC1 3AU.
The Atari 520 ST gives you the power to defeat deadly enemies, slaughter monsters and outwit cruel captors.

Gauntlet - U.S. Gold. Enter a world of monsters, mazes, mystery and combat in the ultimate role-playing fantasy game.

Tai Pan - Ocean. Voyage to 19th Century Hong Kong for action and excitement with pirates, smuggling and mutiny.

Metrocross - U.S. Gold. It takes lightning reflexes to get past the potholes, obstacles and forbidden zones to reach the other side. And that's just the beginning!

Arkaneid - Imagine. Are your reactions quick enough to handle 33 different play screens?

Star Raiders - Atari. Star Raiders are the only force strong enough to hold off the Zycloids. Your task is to command the Starcruiser - are you up to it?

Flight Simulator II - Sublogic. Take the controls of a Cessna 182 or Learjet 25G. With high-speed 3D graphics for take-offs, landings and acrobatics, it's just like the real thing!
But it's not all fun and games.

1st Word Plus – G.S.T. Professional word processor featuring U.K. spellings and integration of graphics including 1st Mail for full control of form letters etc.

Superbase Personal – Precision Software. All the features of GEM combined with full relational database power. Easy to set up, flexible, plus unique picture index facility.

Fleet Street Publisher – Mirrorsoft. The complete desk-top publishing package. Gives you page make-up combining text and graphics for sophisticated, professional looking documents.

VIP GEM – Silica Distribution. VIP Professional is an integrated spreadsheet, database, and graphics package. GEM environment plus Lotus 1-2-3 compatibility.

Mixing business with pleasure is no problem with an Atari 520 ST. Not when you've got over 1,000 software titles to choose from.

You'll find all the latest games and a huge range of business titles from the top business software houses. And the range is growing all the time.

You won't be short of power, either. The Atari 520 ST is twice as powerful as most business micros.

So you'll be able to create spectacular colour graphics. Even animate them to make your own films.

If you're musically minded, you can compose and play a full symphony.

Or, for those who'd rather write programs than music, the 520 ST supports over thirty programming languages.

In fact, whatever you're looking for in a computer, you'll find it in the Atari 520 ST.

ATARI 520 ST
WORKS HARD - PLAYS HARD
Pillock

I'm a pirate and proud of it. Each month I pirate all the latest games from companies such as Elite, Ocean, Activision, Melbourne House etc. and sell them to whoever I can find who is stupid enough to buy them for three pounds a go. I don't do it because I need the money, I do it because I enjoy ripping off the companies involved.

I didn't enclose my address, but even if I did your false threats wouldn't amount to anything. You can try to stop us pirates but you will never succeed.

Tahir Rashid
ACE pirate
Gosh, you're a bit of a rebel, aren't you? Bet you put the wings of flies too. Dare we say you are a total DIVVY!

Warning

The other week my friend brought me the Konami Coin-op hits for my birthday, for the C64. I looked forward to playing on it, but when I loaded Gremlins there was no title screen, no music and I have seen better graphics on the VIC20. As for Ping Pong that was no better. Hyerpports was OK, the graphics weren't too good but at least it had a title screen. Ye-arr Kung-fus is too easy, all you need to do is wiggle your joystick around and you've beaten it. How could imagine program such crap and charge you a tanner, when they've even left out Mikan? My advice is if you haven't already wasted your money on it don't bother. By the way, I think your mag is great.

Darren Bunting
Cotlnor, Derbyshire
Sound advice. We should have warned you about such shoddiness.

Sensible

Doug 'MEAT LOAF' Sinclair here, halfway through my 'O' grades, writing to you to get a break from memorising Macbeth, and smooching at the sight of 'Macbeth Lockhart'.

Now over to Doug 'MAGNUS MAGNUSSON' Sinclair for some of the questions that baffle man — whoops — computers. Five Star asked to change their dance routine. Is Meat Loaf the greatest thing to hit the world since Queen Victoria? Is Eugene Lacey a spectral apparition from another dimension? What is Matt Houston's real name? (Nick Kelly — Ed.)

Sit down now for the serious side of life through the eyes of Doug 'SANDY GALL' Sinclair. It seems to me that computers have turned solely into games machines. This is fine in moderation (a new game every couple of months or so) but some people I know are letting computers, or more precise, computer games, run their lives.

You may scorn this, but I am serious. If people are putting immediate enjoyment from games before their future, something is very wrong. This problem cannot be pinned on software companies. Parents are the most likely to blame. In my opinion, parents of such children don't care. They think that computers are the future. As long as their offspring have a part of it they will be successful. As a result, they leave their children alone with the computer. They buy them games thinking that computers do nothing else. Soon, their children are game- freaks who never do homework or go outside, etc. They will come home from school, switch on the computer and play games.

I know what I'm talking about. I used to be a games freak but that is in the past. I still play games but also do my homework and plenty of revision.

So parents, do something before your kids persuade you to buy them an Amiga or an ST to play games on. If they can't be separated from the computer, encourage them to start programming. Make them do their homework and revision for an hour or two, before they play the computer. Encourage them to do more and socialise, their future lives may depend on it.

If you print this letter, you may get readers writing in to complain that I'm a square, etc. What I have written about does happen. Don't shut your eyes to it.

Douglas Sinclair
Pomnil, Scotland

Misery

I'm writing to you because I think Mike Pattenden and his miserable old fart Your mag is nothing short of hallowed, but that little smell gives everything bad reviews. I have therefore devised the ultimate torture for him: the whole week playing nothing but the games he's slagged off, and intervals of listening to the Ed's old Barry Manilow LP (zzzz). Maybe this should cheer the little bum up a bit.

Jeff holminstead
Barry, S. Glam
Naff off! No sorry, I didn't mean that, kind of thing costs advertisements. Sweetness, jollity, butterflies and flowers to you all (MP). FS — What about Wizball this ish?

Decision

I write with reference to the April edition of CU and the absolutely brilliant article on the 16-bit super computers, the Amiga A500 and the Atari ST.

Seeing the superb graphics that the Amiga and ST can produce and the brilliant games available, I now intend to buy one of the two. But the million dollar question is which one?

Thee seems to be a lot more games for the ST than there is for the Amiga. Is this just temporary or are the software companies concentrating on the ST rather than the Amiga?

Also, are the graphics on the Amiga that much better than those of the ST's.

So finally I have my computing future up to your experience. Do I buy the Atari ST or the Commodore Amiga A500?

Peter Giacobazzi
Berwickshire, Scotland

You pay your money and takes your choice. The Amiga has slightly superior specifications but costs more. As for the software case, remember the Atari has a head start.

Lone voice

I was absolutely horrified when reading the letters page by two letters in particular and by your replies to them. I refer to the letter titled 'flippant' from Alex Spencer and one titled 'get lost' from R. Robinson.

These are two extreme examples, what right do you have to call someone whom you don't know 'Fat, healthy and rich' simply because you disagree with the political processes in the country in which he lives? I buy a computer magazine because of my interest in computers and not in order to have the left wing views of your letter editor forced down my throat.

Isn't your mag's policy to be as neutral as possible to anyone who cares to be critical of your own? I think it's a pity you're not as impartial as J. P. Ahern in the same issue.

I hope that you are willing to take note of my grave concern.

W. Barry
Bolton

Gosh, we print so many fawning letters don't we? As for left wing views we hope you'll note that the Anti-Apartheid Movement is a blanket organisation taking in everyone from Christians to Communists. That smacks of the typical retort of someone trying to discredit groups like the AAM or even CND (who, as we know, are all Commies).
To help you destroy the aliens

and defeat the taxman,

we've massacred the price.

For a limited period, the Atari 520 STM is even more of a knockout than usual. We're offering it for just £449.95 (inc. VAT) complete with SF354 disk drive, SM125 mono monitor, a mouse worth £24.95 and 1st Word, worth £49.95.

So as well as saving you from the enemy, the 520 STM will also save you £184. You'd better hurry though, because it won't be long before our stocks are wiped out.

ATARI 520 STM
WORKS HARD * PLAYS HARD

*Offer includes mono monitor. The 520STM plugs into a standard colour TV.
You’ve read it, you’ve watched it and now you can play it too — yup, it’s MASK the game. The very unpleasant folk at VENOM have scattered your unfortunate fellow-MASK agents all over the time-space continuum and it falls to you, Matt Trakker, to search for them. In your trusty but sadly still war-damaged transporter Thunderhawk you navigate dangerous terrain, avoiding or, if necessary, blasting obstacles and VENOM patrol craft. You have to retrieve your missing agents — and their masks, which are also lying about the place. MASK by Gremlin, should be in the shops in July.

Firebird are ready to let fly with another volley of cheapos of exceptionally high quality. The game in the picture is provisionally entitled the Big Four Pack. It features four golden oldies for £1.99. These will take you back a bit — there’s Invaders, Asteroids, Snakes, and Space Wars. A nice little piece of software nostalgia of less than 50p a shot.

There is nothing old fashioned about 1 Ball — a futuristic shoot’em-up in which you build up your fire power by collecting extra weapons as you travel. This is a fast and furious shoot’em-up in the mould of Terra Cresta — with the screen crammed full of nasties and explosions. The aim of the game is to rescue your fellow ‘balls’ — trapped at the end of each level. There’s ‘Lover Ball’, ‘Eddy Ball’ and ‘No Ball’ amongst the twenty six levels of play. A wacky sound track and really loud sound effects make this game a hot favourite for next month’s Cheaps of the Month.

Now, here’s something a bit different: a game within a comic within a game! In Accolade’s Comics, you play dashing comic strip hero Steve Keene: Private Spy. You’re the leading character in a frame-by-frame adventure story, with one frame appearing on your screen at a time. But you can also control your destiny by changing the dialogue and the course of action in the story. Different choices will mean different plots. At various points in the story a series of frames will lead to an arcade-style game, which Keene (alias yourself) will have to come through in one piece in order to be able to continue with the story. Can he do it? Can you understand it? Find out in July.
DECEPTORS

Are you one of those folk who secretly rather enjoy fooling around with your little brother's Transformer collection? If so, keep your eyes peeled for Accolade's latest C64 offering, Deceptors, whose metallic hero has the power to adopt three different body forms. You cruise about your 3-D world as a speedy land vehicle, a nifty aircraft or "your very own alter ego in robotic embodiment" (it says here) encountering a variety of weird machines and beasts before having to meet and defeat the keeper who awaits you at the end of each level. Metal up, y'all!

METROCROSS

Though not exactly a world beater in the arcades Metrocross does come from an impressive stable - Atari Games, the people that brought you Paperboy and Gauntlet - a fact being mightily hyped by US Gold.

In its favour it is a high quality 64 conversion. On a recent visit to US Gold I couldn't help noticing that it was Metrocross - and not Road Runner - that the game testers seemed to be most hooked on. So what's it all about? A left to right scrolling game in which you have to negotiate various obstacles against the clock. The chequered road surface causing different things to happen to your player - such as slowing down, speeding up, leaping in the air - very much in the mould of Gremlin's Trailblazer. If you can get to the third level there is the ubiquitous skateboard. We'll be hopping on it next month.

HII FRONTIER

Activision admit to a "certain moral dodginess" about their latest game - Hii Frontier, a simulation of the lead-up to, and aftermath of, a thermo-nuclear confrontation.

The game trades on the excitement of the build-up to the conflict. Very effectively it does this too - with flashing icons, ticker tape print-outs of ever more worrying messages of a build-up - until the big hang itself. It's very well put together. Fast moving, and challenging. Somehow though you just can't help feeling there is something not quite right about playing nuclear wargames.

UNINVITED

One of the more interesting of the initial batch of Amiga games you can expect to see cluttering up the shelves of your local software emporium is Uninvited, by Mindscape. In this chilling little adventure you've arrived in a well creepy house after unexpectedly totaling your car. You're looking for your brother, or, failing that, a telephone. Once inside, it soon becomes apparent that you'll be lucky if you even find your own way out of this gothic nightmare.

With the Amiga's extraordinary graphic capability allowing every chilling detail to be brought out, Uninvited looks like a must for all Amiga-owning adventure-gamers.

Chart Chat

Still topping the charts is Firebird's cute cheapie Park Patrol, but in fact you have to wait until number 4 before you find a full price game, one of only nine in the whole top twenty. The rest of the running is all made by budget games and compilations. No real surprise that Football Manager should make such a strong re-entry into the charts since it now costs two pounds. It could well be topping the league by next month. Further down Monty hops back at number 14, but Paperboy and Gauntlet are still selling six months after their release. But whatever happened to Delta, Thalamus' red hot shoot-'em-up, a new entry at 11 last issue but nowhere to be seen this month?

Over on the C16 chart footy games seem to be popular with three featured in the top ten, otherwise it's all cheapos and compilations. Keep an eye out for Thrust next month — not a brilliant conversion, but likely to be steaming up the charts anyway.

Prohibition

Take that, you dirty finks! A scar-faced fedora’d mobster from Infogrames has just burst into the CU Speakeasy brandishing an incredibly authentic-looking 1920 Thompson sub-machine gun.

Apparently this punk is here to publicise Infogrames forthcoming Prohibition, a shoot’em-up set in that infamous period of modern American history when men wore men and women dressed as men. In Prohibition your mission is to stalk a seedy city block and take out the gangsters lying in wait behind cracked windows, in doorways, under manholes or on roofs.

And just to celebrate the birth of this fab new product, the man from Infogrames has handed us his shooter to pass on to some lucky CU reader. Yes, you could be the proud owner of the gun that ruled Chicago if you can answer this one ridiculously simple question:

How was notorious mob leader Al Capone finally brought to justice? Was he arrested (a) for tax evasion; (b) for splitting on the sidewalk; or (c) for running a protection racket for Chicago barbershops? Answers on a concrete overcoat to:

Prohibition Compo, Commodore User, Priory Court, 38-39 Farringdon Lane, London EC1R 3AU.

The first correct answer out of the moonshine bottle carries away the Tommy Gun plus a game, the next five suckers get a sweat shirt and a game.

BACTA lodges coin-op appeal

Further to our feature last issue on the controversial decision of the court of Appeal that for licensing and other purposes any public premises with an arcade game will be treated as a cinema, the coin-op proprietors trade association BACTA have, as expected, lodged an appeal to be heard by the House of Lords.

Meanwhile, a BACTA spokesman, while agreeing that "it is generally acknowledged that this act was not intended to cover arcade games", refused to confirm a report in trade publication Amusement Business that the Home Office had unofficially stated that they would move to amend the Cinema Acts should BACTA’s appeal fail.

Microprose shot down by Germans

The West German authorities have just slapped a ban on Microprose’s popular submarine simulation Silent Service, apparently for being “too realistic” under legislation designed, among other things, to protect German youth from products which might incite aggressive behaviour.

Silent Service is the second Microprose game to be placed on the Youth Dangerous Publications List, which effectively restricts sales of the game to certain regulated outlets, such as sex shops. Already listed by the German authorities is the American simulation specialists’ F-15 Strike Eagle.

On a recent visit to London, Microprose’s colourful boss, USAF reservist and sometime Pentagon adviser Major “Wild” Bill Stealey pledged that he would fight the ban, if necessary in the West German courts. While supporting the intent of the List, to protect West German youngsters from “outlandish, garish, pornographic and excessively violent graphic representation” Bill is adamant that Microprose products do not fall into this category.

“We believe the time has come for the German authorities to take a second look at legislation which — wrongly in our opinion — lumps together computer software with pornographic videos,” an impassioned Stealey told reporters.
Rebounder

Yes, it's that time of year again. No sooner have the first flowers pushed through to the surface and the birds found their voices, than the public's thoughts turn to Wimbledon and the warm air fills with the distinguished pock-mark of cat-out meeting felt.

Never ones to miss an opportunity, Grenfell have decided that the time is ripe to announce the reappearance in our cosmetics of that most adventurous of tennis balls, Bouncher. This time our furry friend must bounce his way through 16 levels of enemy-infested platforms in an attempt to reach the Master Alien. Obstacles will include flocks of aliens whose intelligence increases with each sheet, sentinels waiting at the end of each level and the never-ending threat of deflation or bursting caused by sudden changes in pressure. Bouncher will be equipped with designer armoured plating and a range of weapons, and with a mission as strenuous as this, he's certainly going to need all the help he can get. Compared to this, getting to Centre Court will be a cakewalk.

Commodore profits - Rattigan's loss

Commodore's President and Chief Executive Officer, Tom Rattigan has resigned from the company, and filed a law suit against his former employers.

Apparently Rattigan leaving Commodore represented the culmination of a bitter dispute between himself and Chairman of the Board and chief shareholder Irving Gould. Gould, it seems, resented Rattigan's high profile and allegedly decided to assert himself in the boardroom so as to reduce Rattigan's overall control of the day-to-day running of the company.

The crunch came when the board sided with Gould against Rattigan in confirming a senior managerial reorganisation. Two days later Rattigan was suspended, and he resigned. Feelings were reportedly so heated that Rattigan had to be physically restrained and taken from Commodore's offices and, according to one source, armed guards were posted outside to prevent him re-entering.

This abrupt termination of Rattigan's involvement with Commodore comes just as the company announces their fourth consecutive quarterly profit.

You're thrown into an arcade-style action game. If you opt for the role of conscientious objector you instead play an adventure in which you join the peace corps and campaign for an end to the war in America.

Remember that excellent, if rather unusual number one single of a couple of years back, "Nineteen" ("In World War Two the average age of the combat soldier was twenty-six. In Vietnam he was N-N-Nineteen")?

Cascade Games have just announced that this anti-war hit by Paul Hardcastle is to be the theme of a new computer game named "surprise, surprise - 19." According to Cascade, this game is "to break new ground in that it closely follows the theme of a successful record." How exactly? Well, the player will apparently take on the guise of a nineteen-year-old draftee who is given the choice between "fighting the war or fighting the draft." If you decide to fight the war,

□ Cheque enclosed made payable to Database Publications Ltd.
□ Please debit my credit card account

Access: Visa

Admission at door:
£3 (adults), £2 (under 16s)

Send for your advance tickets today... With them you can walk past the queues – and SAVE £1 per head off normal prices!
Enduro Racer can definitely be classed as one of the longest awaited conversions since Gauntlet, and nobody but nobody was lost down when they saw the almost unattainable Spectrum version.

For those of you who haven't yet entered your local dark and sleazy arcade and had the privilege of playing this arcade beauty, I will explain what makes supposedly respectable reviewers rob banks. You're a bike rider, who must negotiate all kinds of terrain and beat the time-limit to get to the finish. Yes... that's it. I don't care if there is no 'Save the World' style plot, it is quite simply a bloody good arcade game. Can the 64 version match up to the quality of its arcade and Spectrum predecessors?

At first glance, Enduro Racer looks almost identical to other run-of-the-mill race games such as Pole Position, but that's only until you hit the first jump and go flying off the bike. Enduro Racer gives you the chance to be the next Eddie Kidd (although that doesn't necessarily mean you get to star in a Levi 501's commercial!) The controls are simple enough, forward to speed up, left and right to turn, fire to brake, and pull back to wheelie, which is needed for when you jump. When you hit the ramp you lose precious speed unless you wheelie. You should also note that when you are in the wheelie position you can't turn, so be careful wheelie! Another feature which moves Enduro Racer gradually away from other race games is the fact that it has other riders. So do all race games, yes, but when you touch them on other race games it has some effect (which basically means you crash) but on Enduro Racer touch the contenders and you will find out that they are either ghosts or deformed sprites. Enduro Racer has five courses, each level consists of jumps, a different type of land hazard such as desert, opposing riders, and boulders, at least I think that is what they are supposed to be, but they look remarkably like elephant dung. To complete each track you must simply get to the finish before your time limit runs out. If the unfortunate happens and you do not make it, the computer will tell how much of the track you did complete as a percentage.

The terrain of each course is different, although this isn't just for extra gloss. On level three the ground isn't even ground (L.E.P. - Very confused Ed.) it is water. Touching the water slows your bike so you must jump with as much velocity as you can manage.

The only thing Activision had to do with Enduro Racer was a decent conversion job, as the arcade game is outstanding. When I played the Sinclair version I gasped at the graphics and playability Activision had crammed into the little machine. But on seeing the Commodore version I can't help but feel a little cheated. It isn't awful and I can't help but dream about how it could so easily have picked up where Clive's puny 48K machine left off, using the Commodore's added capabilities to make the perfect conversion. What has actually happened is the detailed graphics, smooth scrolling and gameplay has been forsaken in an attempt to improve the game. What you are left with is a haphazard collection of sprites, jerky scrolling, and a less than impressive soundtrack. Some very fixed priorities were at work here. I love that arcade game and after seeing what Activision done on the Spectrum this definitely had the potential to be the best ever conversion on the 64.

Despite my negative feelings towards this I think I'd still buy this, but only to stop myself spending money at Ye Olde Change-Gomper.

Chink! Warrior steel meets steel. Thwack! The green warrior gets it in the goolies.

BARBARIAN

B os. That's what's uppermost in my mind as Barbarian loads. Come on Ed, I say to myself, this is the latest game from Palace, the people who did Sacred Armour of Antinia, that's what you should be thinking of — not Maria Whitaker's chest measurements.

I make no apologies for this. Palace only have themselves to blame. If they must use a page 3 girl in the packaging and promotion of their title then they can only expect people to go on about Maria Whitaker rather than the game itself.

Great shame this, as Barbarian has stacks to recommend it. Thankfully, when you get into the game there are no pouting pixels to distract you — in fact Maria is so small on screen that her breasts look about half the size of a Birds Eye petit pois.

So, perverts — if you are thinking of buying this to get cheap thrills — an impression it would be easy to get from the cassette inlay — then forget it. What you do get out of the game is an extremely well put together sword-fighting game.

Beat 'em ups stand or fall on one thing — how well the moves can be implemented with the joystick. Games that did this well and succeeded are International Karate and Fat — the ones that didn't were Rock and Wrestle, and Fighting Warrior and, to a lesser extent, Uchimata.

Barbarian is very much in the first category. There are sixteen possible moves and I successfully executed them all over a three day review period. Obviously some are harder than others and it is possible to put up a reasonable fight with a mastery of half-a-dozen. The point is they are all there, they all work, and you can use them if you want to.

Best 'em ups have to have a story line and Barbarian is no exception. In this case a dirty old man of a sorcerer, Drax, is threatening to give the "people of the jewelled city" no end of grief unless Princess Marian (I wonder who she is supposed to look like) is delivered to him.

Of course, you, the Barbarian, having just popped down from "the forgotten world lands of the North" are not going to let the beautiful princess be enslaved by Drax without a fight. So pick up your sword and start swinging. This is your chance to rescue a beautiful Page 3 girl, er, Princess Marian I should say.

The first opponent that comes at you is the 'purple' shirt warrior. A piece of cake this guy. You can use him to practice your most difficult moves. My favourite way of disposing of him was whacking his head with a 'Web of Death' swing. This is really something — the Barbarian turns into a spin with the sword above his head and 'chop' — the head is off. Enter a little gremlin who kicks the head across the floor like a football. Needless to say, it is not for the weak stomached, neither would it be a good idea for young children to see all this carnage.

Drax's warriors get tougher as you go. The next one up is the 'green' warrior who is slightly quicker, followed by the 'brown' — a very good blocker and the dark blue who is very mean with the head butts. The light blue warrior is bad, but the guy in black is really tasty.
Screen Scene

magic bolts at you. You can absorb none of these direct hits so you have to jump over them, stoop to avoid them and dodge them in any way you can.

Palace tell me that Princess Marian is watching this from the top window. Should you kill Drax she comes down to say thank you and the game gives you a message. No, I'm not going to tell you what the message is.

Options are many in Barbarian. You don't have to play the game as an arcade adventure. There is an option to let you play it as a straight two player combat game — which in my view is the best way to enjoy Barbarian. I particularly enjoyed decapitating the Dep. Ed in this option you was lucky — Dep Ed.

The graphics are convincing but I have to admit to a little disappointment. After the excellence of Sacred Armour of Antiriad I had expected Barbarian to be just as good, or better. Somehow the game doesn't quite have the same depth and smoothness of animation that Armour enjoyed.

The music is nothing to write home about but the sound effects are good — especially the thud of gremlin's boot on Barbarian's head. Although it's a bit sick, it has to be said Barbarian is a real winner. Beat 'em ups just refuse to die down and die and, when they are as good as this game, should be mighty grateful.

Eugene Lacey.

If you score a direct hit on your opponent a little splash of blood records the swipe. Each player also has six red circles — each time a hit is sustained on his body half of the circle disappears. When they are all gone you collapse in a heap on the floor and the little chuckling gremlin slumps on and drags your body off.

The successful warrior stabs his sword in the air in celebration of the victory.

If you are successful in your fight against Drax's warriors you will eventually get to fight the evil one himself.

This is the supreme test of your swordsmanship. The evil one fires

GLF CHAMPIONSHIP FOOTBALL

Played between you and either human or computer opponents the game is played between two of the mythical GLF’s 28 teams that are arranged into North, South, East and West divisions and include football legends such as the Midgets, Whales, Mules, Cowpokes and Hackers. The leagues play no further part in the game although I suspect there is a disk version in which you can qualify for the playoffs. In this, the tape version the team merely adds variety and levels of difficulty as the top of the table teams have better lines and coaches than the bottom teams. As the game loads in it’s time to catch up on the basics.

American Football is a simple game in which the team have four attempts or downs to make ten yards. If they make the ten yards or more then they get another set of four down and so on until they either lose the ball or reach the endzone and score a touchdown. It’s how the teams try to make the yards is where the skill and strategy come into the game. The basic plays are the runs that buy yards of turf with bruises as the running-backs try to smash their way through. For longer gains or to keep the defense honest (guessing) the wide receivers run complicated pass patterns to get away from the defense so they can catch the quarterbacks long passes. In GLF Football you play the running backs, kickers and wide receivers in all the important plays.

Your first job is to kick off and time your kick to put your opponents as far downfield as possible. off-field line to open up a gap before running in for it. On a passing play you line up on either side of the field opposite either one or two defenders. You then must run the defined pattern for the play to stand a chance of catching the ball. For example, a simple but effective streak left is eight steps downfield then one back to collect the ball where as Curl out right is a little more complex with four steps downfield followed by four to the sideline before collecting the ball. These patterns are essential to keep the defense guessing and to ensure that the quarterback throws the ball to the right place. These plays aren’t as complicated as they sound and you’ll soon be making power blasts with post and endlines to get down field to score a touchdown.

GLF Championship Football is a simple game to play that relies heavily on its “Helmet view” graphics. The result is a playable but simplified game in which the game is played over 4 or 7 minute quarters (not 15 minutes), uses unknown teams, only two penalties (delay of game and jumping off too soon) and tight rules that means that once you’ve called a play you have to play it (no chance to fake a punt, run a pass or razzle dazzle and run play into a touchdown pass.) GLF Football will appeal to new football fans but real fans shouldn’t expect too much from it.

Gamestar/Activision

Price: £9.95 cassette
£14.95 disk

Sophisticated
score board.

Hulk meets hulk in the grunt and grind.

Kicking for goal.

Screen Scene

You’ve heard a lot about Football, American style. You may have even watched the Super Bowl on Channel 4 or played some of the other gridiron games. According to Gamestar (Activision’s pet sports games writers) you haven’t played American Football until you’ve gone down onto the field and felt the pain! GLF Championship Football gives you an inside the helmet view of the perfect passes, breaking runs and crunching tackles.

When your team’s defending you sit on the sidelines but call the blitz, roll out and nickel defences to stop them making the ten yards. The screen then shows the key action in impressive 3D as the ball carrier is inevitably clobbered. Now it’s your turn. Yet again you call the plays from the choice of 22 passing and 12 running plays but then take the leading role. In a run you line up behind the quarterback and wait for his signal as he hands the ball to you. You then must wait for your
A muck a lust sick of detectives with dirty mags, wide brimmed hats and permalit Marlboros? Add to that a lot a spooky stately home, a loony Major and assorted suspicious characters, and you’ve got a story that even the Dukes of Hazard wouldn’t touch.

So with that out of the way, I’ll tell you that The Detective is, after all, a respectable piece of sleuthing. It’s a pity the programmers couldn’t come up with a better story because the mechanics of solving the murder — did I say murder? — are very good.

But first, the story so far. Angus McFungus is dead — probably died of a hussy name. You, as Inspector Smide, must go to his mansion in the country and solve the crime using your astoundingly deductive powers and a joystick.

The story unfolds as you wander round the mansion’s rooms picking up clues and questioning the many characters who’ve got nothing better to do than wander round with you.

There are lots of them too, and they’re all true to the Agatha Christie recipe. Major Sludgebucket loafs around the corridors mumbling deranged phrases whilst his moustache flaps up and down. There’s a cook, a maids and Bentley, the obligatory Butler. Then there’s Cynthia, the Major’s granddaughter, a mad professor, a doctor and a vicar. Last but not least is Mr. Dingle the solicitor, who’s come to read the will — but may not get the chance.

All the characters can be questioned, but whether they’ll tell you anything is a different matter. Both the cook and butler are pretty cagey. Daniel the maid will talk but she’s not very bright. Both the major and the professor are raving loonies. Then there’s the vicar who looks as though he mugs old ladies in the confessional. Rumour has it that he did his wife in — Daniel told me.

The mansion is set out in three floors. Upstairs you can explore the bedrooms and pick up any objects you feel are evidence. You have ten padded envelopes and each must have a piece of evidence in it before you can crack the case. Objects you’ve picked up can also be used in various ways.

Similarly downstairs there’s a dining room, library and hall to be snooped through. You’ll find the kitchen and servants’ quarters in the basement.

If you made the mansion sound stage, it’s not. The locations are remembered easily and you won’t have to bother mapping it if you play long enough. By the way, there’s a time limit for solving the crime. At one stage of the game, somebody turned out the lights and shot me dead. I don’t know whether I ran out of time, or maybe the characters are nastier than I thought.

Anyway, if it were all just asking questions and finding evidence you’d soon get bored. What makes The Detective consistently interesting is that events happen while you’re playing.

There I was upstairs questioning an old lady when somebody pushed a piano from the bannister and扁了 Cynthia who’s lurking in the hall. Blast, and I didn’t get round to questioning her.

And Mr. Strangle gets dangled, so Mr. Dingle gets strangulated before he can read the will. But his briefcase might be worth looking into. And poor old Gabriel, I found her done to death in her own room. All this was happening, I admit, whilst I was snooping around in the kitchen. Would you believe it, there’s a microwave in there.

Argus have made the game easy to play by providing you with an icon for every action and function. Simply select the appropriate one by pressing the joystick button. Moving around is done via the joystick too.

There’s absolutely no text to be typed in. Asking a question merely involves activating the question icon. You can then select anyone in the room. That person will then wait whilst you position yourself to face them.

Having done that you can ask any of the other guests about Angus or about any of the objects you’ve collected. Their answer appears as a scrolling line of text. Be warned, nobody’s keen to spill the beans.

Graphically, The Detective is no masterpiece. All the bedrooms look the same and the designer hasn’t gone overboard to make the house look lived in. But the characters are nice and large, and their faces move when the talk. I particularly liked the vicar, who looks more like a vampire — or a red herring.

Soundingwise, there’s little more than the title tune, a particularly inappropriate wandering guitar number. The only sound in the game is the tapping of footsteps and a nice organ crash when something disastrous happens.

The Detective is a well-thought
out and well implemented game. And it has unexpected depth. Try following Bentley around to get into his locked room and he'll eventually turn round and say slyly, "Looking for clues, Inspector?". Just for that, I'll nail him whether he's guilty or not.

And in those respects the game deserves better than the mouldy old story Argus have lumbered it with. Still, for what it is, it's pretty enjoyable. One small gripe, the blurb says there are secret passages in the mansion. I haven't found any yet. But then again, I'm not wearing a dirty mac.

Bohdan Buciak
Nemesis prepares to waste a few terminators.

Introduction screen-Torquemada gets shirty.

Martech
Commodore
64/128
Price: £9.95

Regular readers of 2000AD will know well of the feud between Torquemada the grand master of Termight, and Nemesis the Warlock. For those who aren't keyed in so well to the events of Tharg & Co, Nemesis is a warlock dedicated to stopping the genocidal urges of Torquemada who dabbles in the unfortunate habit of killing aliens by the hundred. Their hatred is increased because Torquemada killed Nemesis' wife. Nasty piece of work isn't he?

The game charts one of Nemesis' many attempts to finish once and for all the terrible reign of Torquemada. Evil as Torquemada is, he is not stupid enough to leave himself unguarded, for protection he sends out his personal army, the Terminators. You as Nemesis must fight your way into the heart of his domain and at last defeat the evil Torquemada, but remember, the lives of fellow aliens are in your hands!

The game is basically a shoot 'em up with platform tendencies, although the platform element does not have too great a bearing on the game. Each screen is set out with five or six floors, from which you can jump from one to another. From his control centre Torquemada sends down Terminators by the dozen. Nemesis can either hack about the Terminators with his notoriously tested sword Excessus, or he can pick up one of the few ammunition cartridges to be found around each screen, which will enable him to fire twelve shots from his gun.

This way to complete each screen is to kill the required amount of Terminators shown in the bottom left-hand corner of the screen. Once this is done Nemesis must then search for an exit, which can be found anywhere on the edge of the screen. Once this is done he will then be transported on to the next screen to pursue his quest for Torquemada still further. All the screens are similar but with a different arrangement of platforms and yet more Terminators to be slaughtered.

The Terminators may seem like they are all you have to defend yourself from at first, that is until one goes into labour and watches a zombie pop out of it's stomach, in true Alien style. The zombies, though few, are a grave danger to Nemesis as they take far more shots or stabs to kill than the Terminators from whence they came. There is but one more way of disposing of the Terminators which is by spitting acid, yes, spitting accurately is another one of Nemesis' seemingly never-ending qualities, although he can only gather enough sulphuric phlegm to do it once per screen. When you do resort to acid-gobbing you will realise that even the zombies are no match for this disgusting habit. Imagine what Nemesis can do when he catches a cold!

Despite its many appealing qualities (gobbing?) like the pretty graphics and atmospheric theme tune, Nemesis clearly reminds me of Melbourne House's (rather silly) Knuckle Busters or even their other 2000AD licence Judge Dredd. It has the same pretty presentation, but after a short while playing proves to be a game with no depth, which totally destroys your motivation, and gives you no other incentive to play other than to get your money's worth from the real tries you just forked out. For those of you with your heart on Torquemada-bashing, it ain't bad, but don't expect anything new.

Turn to the person next to you and say in a slightly high-pitched voice 'Beep beep'. It can only mean one thing — Road Runner — the wackiest and most frustrating cartoon series ever to come out of Warner Brothers.

Atari were well aware of the power of the catch phrase when they designed the smash hit coin-op based on Road Runner as it is liberally sprinkled with 'Beep beeps'.

It is odd therefore that there is some confusion as to whether the 64 version will or will not have 'Beep beeps'. The best I could get out of US Gold's spokesperson was 'Yes, it should have, I've told him to put them in'.

I regret to have to report that quite a few things about the conversion weren't too clear when I was invited up to the firm's Birmingham office to see the 90% finished demo tape.

A rather hard-pressed production manager managed to pluck some working levels from a crowded disk. This involved much crashing, re-loading and mutterings of 'Why can't they send me proper demo disks'.

None of the levels had sound effects or music, though I was assured that the music is 'brilliant' and that the game will have everything that the coin-op has, including all twenty-six levels.

The screens I did see looked fairly close to the coin-op. This would not be too difficult to achieve as the graphics in the coin-op were not too elaborate. An Arizona mountain pass with much yellow sand, blue sky, and stark rocks.

The Road Runner and Wile E. Coyote are slightly smaller than they appear in the coin-op but they are not tiny and you can see clearly enough the bicycle wheel effect on the Coyote's chest and the puff of smoke at Road Runner's heels as he scurries.

If you have played the coin-op you will know that speed of moving in all directions is the essence of the game.

You should not expect the 64 to be as fast as the coin-op but it did appear to me to be nifty enough to reproduce the basic feel of the coin-op.

The real test for this conversion will be how well they manage to get the sound track (The William Tell overture) to knit into the game play.

It is the way that the music speeds up as the chase gets more and more frantic that makes Road Runner such a winner in the arcades. The William Tell piece is not the only music that sets the scene in the coin-op — you also get the twangy Looney Tunes 'That's All Folks' jingle at the end of each game.

If you haven't played it in the arcades the basic aim is to put as much distance between you (the Road Runner) and Wile E. Coyote as possible.

Instead of rushing across the screen left to right, Road Runner sends you the other way pursued by the hungry Coyote.

As you belt along Road Runner needs to munch away at five piles of seeds. If he fails to scoff all of these before you reach the end of the level or eats the bits with lead in it you lose strength and the Coyote will snatch you and you lose a life.

Road Runner was recently voted CU readers second favourite coin-op after Outrun. US Gold have been beavering away on the 64 conversion — due in the shops in June. The Ed journeyed to Crossroads land to check it out.

Road Runner shows Wile E. Coyote a clean pair of heels

There are some people who think this takes too much of a liberty with the cartoon series — in which that damned bird always gets away. I'm not too concerned with this — it is nice to see Road Runner get his comeuppance, though it might have been an idea, as has also been suggested, to have a choice of playing either character.

If this basic fact takes you a bit away from the original cartoon is there much in the game that is highly Road Runner-like.

The obstacles that confront you and the tricks that the Coyote gets up to are straight out of the cartoon. On Level 1 for instance the ACME tracks come thundering down the road and will flatten any bird or Coyote that happens to be in their path.

Just like in the cartoon many of the obstacles and props designed to catch or kill the Road Runner can be reversed and used against the Coyote to earn extra points.

Nifty forwork can cause the Coyote to be crushed by tumbling boulders or run into a truck.

The only thing you can't do in the game that you might see Road Runner doing in one of the cartoons — is to pinch the Coyote's pigtails.

These are pretty impressive too — especially when he gets his one man gyrocopter and starts lobbing bombs at you. This is undoubtedly one of the toughest parts of the game — he tracks you very quickly from his chopper and...
Road Runner run down!

Looks like Road Runner is in a jam as the Coyote confronts him on his pogo stick.

Things get tougher — find your way out of the maze, dodge the Coyote and don't forget the seed.

has a pretty good aim.

He's slightly easier to dodge when he is on his pogo stick but the game throws you another equally tough challenge at this stage — in the shape of a Pacman-like maze. You need to move at breakneck speed around the maze collecting the seeds as you go.

If you miss more than five seeds in a row you lose a life. Again speed is what makes this part of the game — and the conversion will have to get near to the coin-op pace if it is to play convincingly.

Like just about every other new game on the market the designers manage to get a skateboard into it. In this case it's a genuine issue ACME rocket-driven board. Pretty deadly this makes him as well. Zooming onto the screen at great speed and dragging you off before you can get an eyeful.

Much of the action described above repeats itself on future levels — it just gets faster and more intricate.

Some of the mountain passes become narrow and intricately weaving, with great gaping chasms appearing which Road Runner has to leap. This part of the game resembles Marble Madness in that you wrestle to stay on the rope and plank bridge that spans certain of the chasms.

The reasons US Gold are confident of including all of the main elements of the coin-op is due to their new refined conversion technique. They start with the coin-op, a video camera, and a really good games player. The whole game is then filmed as a 16:9 games player clocks it for the camera. The programmers then use this video — replaying it time and again, pausing it and studying the screens carefully so that nothing is left out of their conversion.

It would have been nice to see some of the more advanced levels of Road Runner so that I could give you a hint as to how I think it will fair when we finally get the review copy in our mits.

For now, all I can honestly tell you is that the graphics look close and it appears to have the speed that it will need to make it work.
Stoked Out

How to win
We want you to imagine that you are chief professor at the ACME Laboratory for research into Road Runner — bashing or catching devices. Design a ‘state of the art’ device for Wile E and send it to us. You may draw your design or simply describe it to us. What we are looking for is the best idea in the tradition of the cartoon strip.

Send to Road Runner Compo, Commodore User, Priory Court, 30-32 Farrington Lane, London, EC1R 3AU.
Entries must reach us by June 26th and the Ed’s decision is final. Beep Beep!

WIN AN ACME SKATEBOARD

Skateboards are the most popular thing in computer gaming right now. It seems a game ain’t a game unless it’s got one. Metrocross relies heavily on your character getting one as does Wonderboy, 720° relies solely on the theme and even old Wile E Coyote himself hops on one to pursue Road Runner.

It’s no surprise really that boards should start appearing in computer games as they have been making a steady return to the sea side promenades, parks, and BMX courts up and down the country. The new boards are looking meaner than ever with bright splashes of colour in punky designs. There are hundreds of boards on the market with names like the Gator, Rude Boy III, Scorpion, Stone Fish, Hawk, Punk Skulls, Psychosticks and dozens more.

The new skaters look smart in their own cult gear. Sweat shirts must be either Suicidal “Street Cyrus”, “Skull & Hat”, or anything from the Hare range.

Boarders are pretty choozy when it comes to music as well. You won’t catch them stuffing the likes of Mel and Kim in their walkmans. It’s much more likely to be some speed metal thrash from groups on the Skate Rock Vols, like — the Tupelo Chain Sex, the Screamin Sirens or even Skate Master Tate.

Of course all of this gear is not essential to enjoy the tricks you can get up to on the new design boards. You won’t care what your wearing or listening to once you start laying down some ‘kick turns’, ‘kick flips’, ‘ollies’ and ‘street plants’. CU is going to help you get really started!

In connection with US Gold we are giving away £500 worth of the best skate boarding gear available this side of the Atlantic. The First prize includes a board of your choice, skate boarding trainers, elbow pads, knee pads, crash helmet, a Walkman and Skate Rock Volume 1 to 4.

We will also be throwing in a copy of Metrocross and Road Runner for rainy days.
Fifty runners up will receive a copy of Road Runner for the C64/128.
Killed Until

Murder and mayhem are currently flavour of the month. *Killed Until Dead* is Accolade's whodunit offering. There are twenty-one mind-boggling cases packed into the game tape to test whether you, Hercules Holmes, actually are the world's greatest detective. Can you uphold the family honour and apprehend the murderer before he or she strikes?

The scene of the crime is always one of the nine rooms of the Gargoyle hotel where the world's top five crime writers have gathered to plan their dirty deeds. They're known as the Midnight Murder Club and each aims to stake the claim that they are the world's greatest murderer! With five fanatics trying to bump each other off you're going to have your work cut out on this dark and stormy night...

As the house detective of the infamous Gargoyle hotel (the hotel where everyone checks in but only a few check out) you're ready for the challenge. At your disposal you have every piece of high tech crimestopping gadgetry ranging from hidden cameras to wire taps. As the game begins you're sitting by your desk with everything you need at your joystick controlled fingertips.

In any crime investigation the first task is to get to know your suspects by reading their files. Exactly how knowing that Sydney Meantstreet once caused a total eclipse of the sun, or that Mike Stammer eats birds and is partial to blondes, that Agatha Maypole hates single bars, that Lord Peter Flimsey's idea of beauty is Princess Anne in Jodhpurs or that Claudia von Bulow has a collection of leather hats will help you is uncertain but it may highlight some differences. One thing is certain, someone will die, in just twelve hours, at midnight.

Your famous ancestors used their magnifying glasses and little grey cells to sileh the solution. You use less subtle means and set about breaking into the suspects rooms to search for clues. To get into a room you must first ensure it's empty and then break in by correctly answering a murder mystery trivia question. This may sound odd to have trivia questions in a whodunit but it seems to work. You also learn some interesting snippets such as Vermont is the place to live if you don't want to...
be murdered and that you could be hung in Britain in 1819 for committing any of 222 crimes. Each question has only four multiple choice answers so you're bound to get in eventually but you'll lose valuable time trying.

Inside you may find some embarrassing evidence on the suspect and perhaps some notes about meetings they've arranged with the other characters. You should monitor these meetings either yourself using the hidden cameras or by recording them using one of your three programmable tape surveillance machines.

At last you're on the trail and it's time to question the suspects. As well as being members of the Midnight Murder Club they're also part of the red herring club so you're going to have to shock them into helping you. The dirt you found in their rooms is a good start which should get them worried. You can then press your advantage and ask them about the likely killer, victim, location, and instrument. As long as they look rattled you can think about believing them.

Finally, you should check your electronic notebook that automatically records details of break-ins, monitored conversations, phone interrogations and tip-offs before you confront the killer. Now you must select the right victim, instrument and location and suggest the right motive. Get it right and you will have solved your first case. One down and only twenty to go! If you're wrong you become the victim as a gun appears through the window and shoots you dead.

Five possible killers and victims, five murderer weapons and nine location ensures that you won't solve a crime by chance and four levels will keep you slugging to the final solution. In the Elementary cases the going is fairly easy with regular tip-offs and lots of meetings to help you track down the killer in cases such as Mars Needs Women and Fast Food Fight. Murder Medium Rare is the next stage and you'll have to solve the case of Publish or Peril on your own. Cases for the Cunning (such as The Case of the Mutated Moose) adds a healthy helping of red herrings and less break-in notes. If you want to find the clues then you'll have to look for them!

Finally, cases for Super Sleuth feature cases such as Rhymes and Crimes that are stuffed full of diversions, suspects that know nothing, others that deliberately mislead you and no help at all.

Killed Until Dead is the third Whodunnit game to be recently released as the software houses catch crime fever. Unlike the L'Affaire Vera Cruz (Infogrammes) which is almost an adventure style whodunnit! Killed Until Dead is completely joystick controlled, easy to play and highly addictive. Each case takes about half an hour to complete (one way or the other) but are varied enough to ensure you tackled all twenty-one. Like the Accolade's other titles, Hardball and Psi-5 Trading Company, the game oozes quality in both its gameplay and graphics and is highly recommended for all digital detectives.

Tony Hetherington

Surely this innocent looking knitting granny couldn't have done it.

The movie reviews — The Times summed it up for me.

"Sydney will be meeting Peter in P's room at 5:00."

Overall 8
**TIGER MISSION**

Price: £9.95/cass

64/128 KELE-LINE

**Screen Scene**

Very precise control needed for landing.

Though hardly the most originally-conceived game idea this decade, Tiger Mission, by Danish software house Kele-Line, certainly seems to be a quality shoot-em-up, with attractively clean graphics, directional movement and five lengthy levels to complete—including a very tough spot of precision landing on the X-shaped pad at the end of each stage.

You are Brett Johnson, strike helicopter pilot, and you've been ordered to attack the enemy's two Tiger Class aircraft carriers. First, however, you've got to get through an intricate defenses network devised by your foe, a seemingly endless array of tanks, ships, submarines, and gun emplacements, and this is where the problems begin.

You start the game with very limited firepower in your little chopper, and disposing of enemy craft and installations involves your having to fly extremely close to your targets, in order to get within range. The enemy has no such problems, however, and their missiles travel the length and breadth of the screen. Add to this the fact that your speed and maneuverability are also initially very limited, and when you further understand that the enemy tend to appear on your screen in groups and fire missiles in completely random directions, you begin to realize that your chances of ever making it past the first few screens are very slim indeed.

The frustrating thing is that if you somehow manage to survive the first two minutes of the game, chances are you'll be able to acquire the extra speed and firepower that you need to have a sporting chance of survival. You do have a limited number of Smart bombs which will clear the screen of your foes, but you'll still find it extremely difficult to make it to the second level. An added irritant is that every time you lose a life you have to go back to the very beginning of the entire level.

After your first twenty or so times you really start to hate the fact that you've made no progress you do (whole) and it's back once more to the infuriating "get ready to enter level 1" screen.

The second major criticism I'd have to make—though it wasn't a problem which I personally ran into—is that if you do happen to be the kind of quicksilver mutant that can get past the initial obstacles, the later levels don't seem to become much more complicated, so you might well find yourself bored quite quickly.

As variations on the 1942 theme go, Tiger Mission is definitely attempting to be something a bit special—i.e. graphics are excellent (I was particularly taken with the shadow the helicopter casts on the ground below as it flew along) and there's an extremely nifty Euro-march-type soundtrack. But in that quest to make the game tough, Kele-Line seems to have been a bit too clever for their own good.

Unless you are a true shoot-em-up whiz, you're probably going to get frustrated pretty quickly at this not-at-all user-friendly game, while those few who are able to handle the initial challenges may soon become bored with the lack of any real progression.

Disaster looms for the bowler and brolly brigade. The contemptible COUNT CHAMELEON, Master of Disguise and sworn enemy of the establishment, is determined to succeed in his latest and greatest dastardly plot. His sale of rubber goods through mail-order ads in a civil service magazine, has led him to develop the RUBBERTRONIC RAY. With it he threatens to neutralise the starch in wing-collars, loosen stiff upper lips and generally relax moral standards – leading to the collapse of The Empire. Worse still, it will radically and unpredictably alter the bounce of a cricket ball. This bounder must be stopped!
WiZZ

Imagine a world that’s completely monochrome, apparently that’s the way dogs see ours. So pretend you’re an Appalachian Goshound and load up Wizball. Looks a bit colourless really doesn’t it? Apart from that split pea bouncing around the screen that is. But dull it isn’t.

Alright you’ll have to stop pretending you’re a dog now otherwise you’ll never be able to grip the joystick between your paws. Wizball is a game about a world that was dramatically drained of colour.

Wizz Ball

by some miserable old get called Zerk who preferred black and white. Being a psychedelic young chap, that’s just too grim and you try to return your world to its technicolour lollity once more.

Find the right crater and it’ll take you to a new level

You begin, controlling your rather grumpy looking pea on the surface of the planet Wiz. To spread a little brightness about the place you must use your lazers to shoot chemical blobs around the various levels. Hey! It’s a shoot-em-up! True, but you’ll need to use a bit of savvy on this one to turn your world back to day-glo successfully.

Your first problem comes when Wiz turns out to be a bit of a spaz when it comes down to manoeuvring about the place. You need precise control of him, and to get it you need to shoot the little spuntik type objects littered about the screen. Each hit turns them pea colour whereupon you catch them. This starts a group of icons on the top of the screen flashing. Waggle the stick violently and you can gain

64/128
Ocean
Price: £8.95 cass
£14.95 disk
Far Left: Level one with a red paint job

Pea and Cat united as rainbow warriors

Crash, and the pea splinters into coloured splinters

Once you complete a level the wizard fills the cauldron with the colour

Extra powers. The effect is very much like Delta (more of that in Hotshot). Each of the seven icons has a different effect on your pea. It's important you pick up the first two and use them because these give you the amount of control over Wiz that is fundamental to moving precisely around the planet. You can only have two other icons on the boil at the same time. Most important of all is one which gives you a little pal or Cat (short for Catellite) who will stick with you through thick and thin. He is the key to the game, because in order to restore colour to the world you need him to catch the droplets of colour in the cauldrons at the bottom of the screen. Furthermore it gives the game a multi-player type angle, in that a friend can control the Cat. If you're the most unpopular person in your class, you'll have to do it on your tod (keeping the fire button pressed allows the little guy to fend around the screen on his own) otherwise get your bestie mate round with a few cans of 7 Up and let him do the Andy Warhol. Other icon effects include smart bombs, sound throughout is great with some typical Jean Michelle Jarre type tunes from Martin Galway plus effects like radio interference as you move around the planet. One black mark is the Gary Moore guitar solo. Each time you blow it a wailing noise signifies the end of your game and it drives you mad. HM fans will probably love it. This is definitely one groovey game. The idea behind it is strictly different and still keep it immensely playable. Graphics are fab, the pea cute (I like him — he looks miserable all the time) but the Cat is a star. Sensible Software are the boys responsible for the job, they brought you Parallax as well and are to be commended not only for the consistent quality of their stuff but for having a few original ideas of their own. Lika, totally awesome y'know guys?

The bonus screen, take out anything that comes for you

Mike Pattenden
ARMY MOVES

64/128 IMAGINE
Price: £8.95/cass

Imagine's latest tour-de-force is one of the most difficult arcade games it has ever been my misfortune to play.

Add to all that some excellent graphics, tasty animation and a barrage of tunes and sound effects, and you've got solid shoot-'em-up entertainment which will have you weeping with frustration as you play it again and again, determined to crack it.

Army Moves (what a naff title!) takes Commando games just about as far as they can go.

The mission is divided into seven sections, each of which would be a respectable game in its own right, and to play the last three you've got to load the second batch of program and then enter the code word given at the end of the first four sections.

The first section has you driving a missile-equipped jeep along a mostly destroyed Bailey bridge. Coming at you is an endless stream of bomb-laden helicopters and kamikaze trucks.

The game is played with joystick and space bar, and moving the stick to left and right provides deceleration and acceleration, while pushing it forward allows your vehicle to leap over gaps on its enormous tyres. The helicopters can be taken out with your air attack systems (fire button) and the trucks with your ground missiles (space bar).

The trouble is, most of these actions have to be performed simultaneously. As you're going to need one hand constantly pressing the space bar, and the other juggling the stick in three directions and pressing fire, it helps if you've got one of those joysticks with suckers and a fire button on the grip. Even then you might do what I eventually did, and sellotape the space bar down permanently, thus releasing an incessant spray of ground missiles, whether they were needed or not.

Every enemy hit boosts your score, and ticking away in the righthand corner is a petrol gauge which indicates how far you've yet to travel. At it approaches 0000 you're nearly there.

Let's suppose you make it there. You get a bonus score, ditch your jeep, and then take to the skies in a stolen helicopter for the next three stages.

Stage two sees you flying over a desert landscape, looking out for the enemy fighters coming at you from all directions, and which turn in mid-air if they miss you on the first fly past.

Once again, you've got two lots of weaponry, missiles and bombs, so don't be too hasty in removing that

Adding another three stages which you have to negotiate on foot.

You start off in the middle of a mangrove swamp, balanced precariously on a tuft of grass. As you hop from tuft to tuft, avoiding the stinger of quicksand between, swelling eyeballs betray the presence of guerillas in the undergrowth, and they'll lob grenades at you with disturbing

Accuracy. Giant toucans flap towards you with rapacious beaks, and you'll have to frighten them away with gunfire and then duck beneath them.

You're also armed with grenades, but save them for the barricades in stage six. You've now got nine lives instead of the five granted in the earlier stages, and you'll need the lot. The good news is that if you're killed now, you don't get sent back to the beginning, but only to certain determined spots behind you. Big deal!

Stage seven finally takes you inside the bunker stronghold, where you have to be careful when your

- Lower key height

This modern case with its sleek style will transform your '64. The high quality injection mould is superbly finished in the latest ivory-colour. The lower key height is also a boon to your operator comfort. Fitting is very simple, requiring just a Philips screwdriver, and can be completed in less than 10 minutes. Sold now available so order for quick delivery.

DOLPHIN DOS
THE EFFECT IS STAGGERING.

Now established as THE parallel operating system for the 1541 disc drive. Hundreds of satisfied users include business, today, full-time programmers, and many leading software houses, including Gremlin Graphics, Domark, Superior, Alligata, Thalamus, Adventure International, and Software Projects.

The speed and efficiency of this software is truly unbelievable. It is compatible with the vast majority of commercial software, speeding up both the loading of the program and of SEQUENTIAL files. It is compatible with all standard basic (EasyDOS, etc.) programs.

For non-compatible programs it can be completely switched out. It DOES NOT use a special disc format and your existing discs will be compatible.

FITTING
Fitting involves the insertion of two sub-assembly circuit boards, one in the 1541 and one in the 64/128. These normally just plug in but on some 64s a small amount of soldering is necessary.

SOME OF THE FEATURES
- 25x FASTER LOADING (PRG FILES)
- 12x FASTER SAVING (PRG FILES)
- 10x FASTER LOADING (SEQ FILES)
- 3x FASTER SAVING (SEQ FILES)
- E.G. LOAD 256 BLOCKS IN 5 SECS
- EXTRA BASIC COMMANDS

ExTRAS AVAILABLE
- Kernal for 128 in '64 mode £9.95
- User port expansion and 32K £12.95
- Dolphin Copy (Shuffle disc in 18 secs and lightning fast tape copy) £14.95
- Dolphin main card for second drive £15.95

THE CHOICE IS YOURS!

FREEZE FRAME Mk IV
NEW PRICE . . . WHY SETTLE FOR LESS?

Now you can buy a pedigree Freeze Frame backup cartridge for a startling new price! No need to settle for less, this is the latest development in the Freeze Frame range. More power, more features, easier to use.

POWER

LegendTary amongst cassette users and with continual development now even more impressive.

FEATURES

Three cartridges in one - fast fail-safes, and backup
TAPE TO DISC
disc to DISC
TAPE TO TAPE
DISC TO DISC

So simple to use, plug in and switch on, at the menu choose your option, no messing with software, it's always ready.

Load the program that you wish to backup, press the button on Freeze Frame, then you can either:
1. Press 'D' to save to disc with fast reload.
2. Press 'S' to save to disc with standard reload.
3. Press 'T' to save to tape with fast transfer.

MULTI STAGE PROGRAMS

The standard mechanism will transfer to many tape based multi stage programs, e.g. Summer Games II, Silent Service, Winter Games, etc. and when used in conjunction with the regularly updated "F.F. Utility Disk", the vast majority of programs of this type can be handled.

MORE FEATURES

+ Doubles as a fast load cartridge
+ Loads extra parts fast
+ Built-In Fast Format
+ Built-In File Copy (up to 248 blocks)
+ New "SELECT LOAD" feature (Press "L") for directory, select with cursor, then press F3 to load.
+ Undetectable by software
+ Files compressed for disk economy
+ 128/256 compatible in '64 mode

PROGRAM RELOAD IS INDEPENDENT OF CARTRIDGE

NOW ONLY £28.95

At this price there is no need to settle for less
UPGRADES: Mk I or II . . . £14.95
Mk III or IIIB . . . £9.95
Mk IV to LAZER . . . £11.95

FREEZE FRAME LAZER
ANOTHER TRENDSSETTER?

From the design team that changed the face of backup technology comes another innovation. The powers of Freeze Frame have been combined with a staggeringly quick new loading system. An amazing 32K of RAM provides you with all the facilities of Freeze Frame Mk IV as described opposite, plus the stunning new LAZER loading technique.

Check these LAZER features:
* Reload a program In 10-15 seconds
* Save a program In 20-25 seconds
* Loads extra parts at VERY HIGH speed
* Load speed approx. 20X normal
* Save speed approx. 20X normal
* Includes RELOAD

Cartridge must be present to reload at LAZER speed
Proven power with stunning new technology

ONLY £39.95

UPGRADES: Mk I or II . . . £29.95
Mk III or IIIB . . . £19.95
Mk IV . . . £11.95

"F.F." UTILITY DISC V.2.0

The fifth version of the country's leading disc backup utility program. This latest version includes many "PARAMETERS" to handle the latest highly protected discs. This includes the latest American and English software. Be warned if you want to back up software by Ocean, Gremlin, Hewson, Domark, and even U.S. Gold whose protection schemes are NOT always the same as the American versions, then you MUST have "D.D."! At press date, we are sure NO other advertised product will handle all these, be it American or German.

INCLUDES THE FOLLOWING
+ Evesham 3 Minute Nibbler
+ Evesham 8 Minute Nibbler
+ MANY PARAMETERS (the vital code for the protection schemes)
+ FAST FILE COPY
+ UNSCRATCH
+ DISC RESCUE
+ DISCOM +
+ ETC., ETC., ETC.

The whole package is menu driven and has its own fast boot system built in for your convenience. Pays for itself the first day you receive it.

ONLY £24.95

Customers with earlier versions may return these along with a payment of £1.25 increase to V.5. Most routines are IBM 120 and 1570/71 compatible In '64 mode.

QUICKDISC+

Our highly popular fast load save and save utility cartridge has received many favourable mentions.
* FAST LOAD [5 to 7 times improvement]
* FAST SAVE [5 to 7 times improvement]
* FAST FORMAT [20 seconds]
* FAST BACKUP (4 minutes)
* FAST FILE COPY (up to 248 blocks)
* EASY DOS COMMANDS
* CENTRONICS PRINTER DRIVER
* RESET BUFFER (unstopable)
* HELPS MENU
* USES NO MEMORY
* 128 COMPATIBLE (64 mode)

Exception value for money at only . . .

£19.95

DOUBLER

THE tape backup "device"

Many thousands of this popular product have been sold and sales continue to flourish. Why? We think because it is the best product of its type. Consisting of hardware and software. It uses a unique method controlled by the software that allows you to produce perfect backups of your tape software.

It is very easy to use and very successful, in fact our tests have proved that Doubler can achieve 100% success.

ONLY £12.95

1541 QUIET STOPS

Cure for ever the dreaded 1541 drive head "hammering"
* Easy to fit
* Detailed Instructions
* One kit does two drives

Only £4.95

Not suitable for "turn lever" type drives.

Callers welcome.
Meet Mario an' Luigi, two ver' nice Italian boys. They gotta dis' lil' problem wiv da turtles and crabs, dey keeps droppin' outta de pipes, an' bitin' dem on da bums. Ees no joke; I'm-a-tellin' ya.

Mario and Luigi are of course the Mario Bros, and this is Ocean's version of the Nintendo arcade original. And very good it is too.

Basically a platform game, it plays differently to any others. For starters, the platforms are super slippery, making movement at speed difficult and dangerous. And the ledges are also rubbery, so that jumping causes the ledge above to bend, and anything on it will flip over.

And that's the whole point of the game. As the shell-creeper turtles drop out of the pipes at the top of the screen, and descend level by level, Mario and Luigi scramble about, avoiding fireballs, and bouncing up and down to knock the shell-creeper on their backs. Then before the things recover, they quickly boot them off the ledge.

Well, it's not as easy as it sounds. The shell-creeper turtles are spawned forth in increasing numbers and as play progresses they move even faster. Soon the screen is crawling with the vicious little brutes, and the Mario Bros spend more time escaping from them than kicking them. The lads have only three lives each, and one touch from a shell-creeper or fireball is fatal.

Mario and Luigi have, however, one trick to fall back on in times of crisis. In the centre of the screen is a large POW button, and if they hit this then all the shell-creeper on-screen are stunned, and the Mario Bros can dash about kicking the shell out of the lot. Unless, that is, some of the creatures were already stunned, in which case they recover when the POW button is employed. Not only must this device be used with care, but also sparingly, as it disappears after only a few hits.

Phases 1 and 2 are shell-creeper screen, and getting through those brings our heroes to Phase 3, a bonus screen where extra points can be grabbed by hitting as many discs as possible in the time allowed.

Phase 4 introduces the side-steppers — large crabs, and lots of them. These have to be stunned twice before they can be toppled, and it's quite likely that this will be the end of the line for Mario and Luigi. Rumour has it that later screens have flies on them.

In a two-player game, each player controls one of the brothers and they can decide whether to help or hinder each other. If only one plays, then Mario alone takes on the massed hordes of shell-creeper and side-steppers. Playing with two is more fun, but playing alone is a damn sight more difficult.

Everything that should be in a decent arcade game is present — lots of silly sound effects, fast action and smooth movement, bonus points all over the shop, and a decent slice of slapstick comedy. Incredibly easy to pick up, the game continually opens up as you improve your tactics and play like comedy. Sadly, although there is a hi-score board, it doesn't include any ranking, so there's no way of comparing your scores.

Unfortunately, if you're well familiar with the Nintendo game, you'll find this doesn't seem like it at all.

Still, if you're into a bit of head-banging and crab-stomping join up with the Mario Bros. You know it makes no sense at all — but it's great fun.

£14.99 disk

So what if a game is being released this month by the name of "The Last Ninja"—no one is really naive enough to think this will stop companies flooding the market with karate games. You are a trainee Samurai under the guidance of supreme master Chu-yu. With his help you must pass a series of tests. If you pass you will be made a Samurai warlord, which is Chinese for a mean son-of-a-bitch.

The game is set out in to three beat 'em up style sub-games, karate, kendo, and Samurai. Being a Gremlin game you can expect millions of options... you are right. After deciding whether you wish to read the instructions in German, French or possibly Spanish (for those of you rushing off to the Costa del-crowded in August), you then are asked if you wish to have a little practice. You don't, so as usual it's straight in at the deep end.

Game one is Karate, and if you were the coward who chose to practice, you just continue fighting to your heart's content, but if you chose to play a full game then things are not so simple. You are first asked to choose one of the five opponents, then are shown a chart with skill, speed, strength and stamina displayed on it, you have five points to allocate between the four methods. The idea behind this is to use the points wisely to counter your opponent's method of combat. After spending a few minutes (and hours) negotiating that last problem, you must then decide how to train for the bout. There are twelve types of training, from which you must choose three. You go from the normal workout stuff like running and the more eastern ones such as Makwara which is sweet & sour pork for shadow boxing.

Then it's down to the fighting; the characters are large and bright. But do not have the clarity or the animation of late greats such as Fist. To win a bout you must fight the computer ten times and then let the computer decide the winner in true Hagler Vs. Leonard style. That is unless you can deplete all your opponent's energy and kill him, when this is done the supreme master will decide whether or not you are good enough to go on to the next stage which is...

Kendo form of Samurai sword-fighting with bamboo sticks. The procedure is the same as karate except that the game is extremely similar to Melbourne's Fighting Warrior.

If you complete Kendo you are now ready for the final test, the test of Samurai. Choose an opponent and cross-swords till death (cue cries of Wow! You must fight and heartlessly kill four opponents before you can obtain the title of undisputed Samurai warlord.

Samurai Trilogy is nice on the eyes in every way, holding up Gremlin's immaculate presentation record. But its problem lies in the fact that it is far too nice on the hands. In short it doesn't have enough action to be a success beat 'em up. Yet another release that isn't full of Eastern promise.

Overall 3
THE BIG KO

64/128
Tynesoft
Price: £7.95/cass

Just when you thought you could hang up your gloves for good, along comes another young upstart, beggin' to go a few rounds with the champ who floored Barry McGuigan. This weedy, incompetent, contender hails from Tyneside and makes Frank Bruno look like Frank Bruno. What's more, he's got a mouth on him the size of the Blackwall Tunnel. Unique boxing simulation, it shouts. Stretches your computer to the limits. Superb sprites, superb animation and a touch of humour... a game not to be missed.

Jeez, even Ali wasn't so full of wind. Like, this guy is just asking for it. So, let's see what he's made of. The Big KO is a sub-standard boxing sim and, like all the others, gives you a gang of opponents with funny names to compete against. These include Heap Big Nose (ha!), Groovy Man (ho, ho) and Cheap 'N' Nasty (hey, hey, ho-ho). When you've picked yourself up off the canvas after that rib-tickling, you can indulge in a pre-fight warm-up by choosing your own silly name.

Then you get the presentation: 'In the left corner, Killer Scolding, Best punch, left to the head, second best...'. and so on. Each boxer gets a rating; you're the 'Unknown Tom'. Heap Big Nose is 'the pits', Strongman Joe is 'easy-going'. All this is accompanied by the soothing sound of waves breaking off a distant shore — the programmer's restrained attempt to capture the frenzied blood-letting of the ringside crowd.

These crazed spectators are nowhere to be seen in the fight sequence itself, the graphics being, er, somewhat sparse — just flat blue background, white canvas and ropes. The 'super size sprites' are big, blocky and ugly, the 'superb animation' is laughable (perhaps that's the touch of humour?). The bell rings, the two fighters wobble towards each other, and start throwing punches. There aren't very many to throw — you've only got a choice of four — and there are no dodge, duck or blocking moves. If the action gets too hot, all you can do is step out of reach. There are three rounds, and when the knock-out finally comes (if you don't win on points), it's spectacularly shocking. Then you get a ridiculous announcement about your performance, accompanied by a nauseating fanfare, and if you've won, you get the code word which allows you to load the next boxer. There's a two-player option, in which a friend can take on the character of Heap Big Nose, Strongman Joe or whoever, and the two of you can slug it out for as many bouts as you like. There are also options for switching off the sound, the presentation sequence, and the message which appears below the ring (which is supposed to

UFO

64/128
Price: £1.99/cass
£14.95/disk

The trouble with games like this is that they're well enough that's a real headache trying to come up with something new to say about them. Certainly the plot doesn't exactly grab the imagination by the short and curries. You're an ace crack super Condor fighter pilot, whose task is to save the world from the invading alien craft. You've got four lives in which to do it. Snore.

The game kicks off with an alien attack on what is supposedly New York. Well, OK — it's got a few skyscrapers, and as far as us Limeys are concerned that's probably good enough. Anyway, coming out of the blue sky with its puffy white clouds, and zooming in over the winding country road and green pastures are lots and lots of aliens, flying saucers, shuttle craft, knobly objects and funny things which open and close.

Your Condor fighter zips back and forth along the bottom of the screen, zapping away at all those ancient Space Invader games. The trick is to hit the battides before they start dropping bombs, otherwise you're caught in a snowstorm of missiles which is impossible to avoid. Sure, you can put your shields up by stabbing away at the space bar, but shield power is soon used up, and in any case it's difficult moving the joystick, pressing the fire button and holding down the space bar. It's not much easier if you opt to use the keyboard.

So, best thing is to sit in the centre of the screen, firing like mad, and remembering to keep an eye on the temperature level. If your weapons overheat from all that blasting, they'll temporarily seize up.

When you've cleaned up the Big Apple, your craft enters the hypersonic corridor. This greets you

Fry the Big Apple

UFO — Odin go budget

Fry the Big Apple
Options for Big KO

represent hacking from the nonexistent crowd. Selecting these options will remove most of the game's irritating features, and the rest can be eliminated by pulling the plug.

The Big KO is probably the very worst fight simulation yet to appear on the 64. If you still feel the urge to slap in the old tooth guard and pull on the leather mittens, then ransack your wardrobe for your battered copy of Frank Bruno's Boxing or indeed almost any of the other fight simulations that you bought two years ago. This simply isn't a knockout.

**Killer Scolding**

A platform game — but a slick one

64/128

Mikro-Gen

Price: £8.95

What do the words Kreezer and trung mean to you? Nothing, or maybe something out of Rainbow or Playschool. Well you would be mistaken if you thought it was from T.V. It is, in fact, some of the various objects which appear in Frost Byte.

You are a Kreezer which is a sort of stereotyped super malevolent Yosoid Sylvester Stallone, armed to the teeth while backflipping like an Olympic gymnast. Your fellow Kreezers have been kidnapped by the ghoulish creatures which inhabit the craters of the planet, and you have to rescue your friends before your trung runs out, trung being a fancy name for time.

To help you on your way there are various bits and bobs such as extra bullets (see where the Stallone connection comes in), sweets are also lying around and so you don't get bored there are different colours — each colour has its own side effects like so:

Red sweets allow faster movement, but sometimes too fast.

Blue sweets enable your Kreezer to jump higher. You usually find this particular colour by a jump pad (for a little extra help).

Green sweets are probably the most helpful as they allow for you to fall from an increased elevation.

When you find something killable, you'll find that the killability rating is not so high as you have to be in precisely the right position to hit them, not very convenient if you ask me.

The Commodore conversion of Frost Byte is, if anything, too much of an accurate conversion from the Spectrum as it contains splatterings of colour clash and incredibly spectromesque sound effects (like, crumbly).

Still a very nifty platform game with brilliant touches here and there which gives the impression that it isn't one of many pieces of half-finished games flooding the market at the moment. Like I said, a slick program that should definitely receive a look-in from platform fans.

You are invited to join the Murder Club, but be careful you could end up. KILLED UNTIL DEAD

"YES, IT WAS A DARK AND STORMY NIGHT... A PERFECT NIGHT FOR MURDER"

"Hercule Holmes, had gotten used to nights like this. As the world's greatest detective and resident house dick of the infamous Gargoyle Hotel, I've made a living looking for the subtle signs of impending foul play. Gloomy weather, blood curdling screams, gunshots, empty bottles of poison, bodies tumbling down stairs, a mutilated corpse or even an axewielding maniac might slip right by the untrained private eye. But to a master sleuth like myself, these telltale signs can only mean one thing. The Murder Club has just checked in!"

"The Murder Club? Yes, the Murder Club! Five of the world's bestselling murder mystery writers who transpose their fictional pulp plots into real-life murder and mayhem. Once again they have convened for their annual reunion here at the Gargoyle Hotel. And once again the dark, damp halls will echo with the cries of 'Don't shoot!' 'I've been poisoned!' 'Who stabbed me?' 'I've been shortchanged!' and 'Who took all the hot water? Yes, with the Murder Club at tonight's guests, more than the plumbing will be amiss!"

"Each member of the Murder Club will try to bump off the others and lay claim to the crown of World's Greatest Murderer. But it will not be a piece of quiche for these brilliant criminal minds must match wits with moi, Hercule Holmes! I have only until midnight to discover the would-be murderer, victim, murder weapon and the scene of the crime."

"At my disposal will be every imaginable piece of high tech crimestopping gadgetry known to sleuthdom: minicameras, hidden bugs, even wire taps. Yet all these modern electronic wonders cannot replace my inherent ability as a born detective... instincts passed from generation to generation in the Holmes family."

"Therefore, I accept the challenge. I will uphold the family honour! Before this night is over I will prevent a murder or be murdered trying! If I fail, one of the illustrious members of the Murder Club will surely be killed... yes Killed Until Dead!"

The head to head is as you might expect it, both players battle it out to grab as many droids as possible and cause more death in the alien ranks than each other. At the end of the level the Zeta fighter is replaced by player 1.

The graphics on the landscape are very good with a multitude of evil aliens each one willing to turn you into dust.

A large stumbling block with Eagles is that the playing area is too small, it's so easy to be zapped in the limited amount of space you have, that it tends to make the game slightly off putting. The sound is pretty weak but the gameplay is really the opposite.

Eagles is a brill game — so good that I even let my sister into my room to play the two player option.

64/128 Hewson
Price: £9.95 cass
£14.95 disk

Unfortunately this isn't Andrew Braybrook's latest production, but it's still a very nice split screen, horizontally-scrolling, shoot-em-up, from some people from a company called Danish Designs.

It is now the year 2846 the setting of the horrific war which has raged for over 300 years. The only difference from conventional war today is that it is being fought by genetically created soldiers who destroy anything that moves, or doesn't.

Your mission is to fly across the planet's battle-scared surface to intercept the alien attack squad and retrieve message droids. This is all very well but you are the only remaining Eagle pilot so the future of the world weighs heavy upon your shoulders.

The one player game is similar to Dropzone in that you have to bomb round that plant wasting aliens collecting message droids, and then dropping them down a pipe to safety. The bottom half of the screen is occupied by the computer controlled fighter who is trying to beat you to the message droids. If you can collect and deliver five droids you can obtain a devastator device which acts simply like a smart bomb. At the end of the level you take on the Zeta fighter and if you manage to defeat it you receive a fat bonus or, alternatively, death.

The two player game has two modes, team game or head to head. I'll deal with the team game first.

The two players have six lives between them and each time one loses a life, so does the other and at the end of the level player one goes on to combat the Zeta fighter.

Mark Patterson

More than a touch of Dropzone about Eagles.

Overall 8
Ten-pin bowling has now hit our computer screens in a big way, we had the version on Indoor Sports, the Access 10th Frame, and now Mastertronic release the first ( Cue fanfare! ) ever budget version, but can cheapo bowling possibly work? Hang on while put those shoes that never fit on and I'll tell you.

You can either play against the computer or against a human opponent ( or the Editor! ) For those of you who have been too busy attending Cynthia Payne's seedy parties over the last five years and have missed out on the bowling craze, here is a run down of the sport in which you have to wear those ugly shoes! The basic idea of the game is to stand at the end of an alley, usually with a friend named Brad, and roll a ball down a wooden alley and attempt to knock down ten pins ( which is Yankie dialect for skittles).

You control your player and must first choose where he should start his run up from. You must then press fire to begin the throw and then it's up to your good judgement to release the ball.

Scoring in bowling always looks mathematically impossible, but it's quite simple really, you are allowed ten goes per match and are allowed to throw two balls every go. You one of the two gutters on either side of the alley.

Strike is a fun game but its fault definitely lies in the computer Vs. Player mode, this is due to the fact that for a guy with a memory of 64K he sure is a nerd. On the first ever game I gained a score that was over five times greater than his. I mean

Still seven pins left standing for your second throw.

Score one point for every pin you knock down, except when you ' Strike! ' which is knocking down all the pins on your first of the two balls, this way you get to add your next go's scores to the go before. Told you it was simple. There is just one other piece of bowling terminology I think it would be most useful for you all to learn and that is a 'Gutterball', this is when you roll the ball rather poorly and it ends up in hardly surprising that I beat anyone that dares to challenge me, but after one game it's slightly ridiculous. The two player game however is good fun and can get extremely frustrating.

This game has definitely reassured me that ten pin bowling does work on the computer. Strike is not an immortal classic but definitely better value for money than the Hoodle and Waddle single.

**Screen Scene**

Thwack! The ball heads boundary-wards.

The ball is about as easy as scratching your left elbow with your left hand! If you were feeling fearless, and you chose the game option, you will then be offered the chance to play against the much celebrated computer team, or a friend. After this comes the task of playing.

When in bat for the first time, the only description I can give of the experience was humilitating. There are only really two types of strokes you can do. A bunt, which is holding the ball so it hits the bat and rolls away, or (and most people will choose this...) the slug, swinging the bat backwards and then forwards in an attempt to hit far and possibly go for that all important HOME RUN!

As you can probably imagine the slug is fairly hard.

I didn't quite make such a dog's dinner of the fielding. I say 'quits' in the broadest possible sense as I wasn't exactly baseball's 'Viv Richards'. The fielders are set out in a similar way to rounders one on each of the four bases and others scattered outfield. Your first task is to pitch a ball so the batsman doesn't slaughter it out of the park; this isn't too hard against a feeble human, but all 64K of the Commie's memory banks seem to be concentrating on that vital home run. Once the ball is hit you must then move one of your outfielders to return it or, if possible, catch it. You must attempt to throw the ball to the appropriate base and either get him out by tagging him between bases or throwing it to the one he's running to before he gets there.

Acolade not so long ago brought what was very close the perfect baseball sim.

I'd have to say this one will only be wanted by baseball freaks on a rainy day. So take a rain check.

Fardy Hamilton

THE ARCADE SMASH HIT THAT RECREATES THE SPEED AND EXCITEMENT OF THESE CLASSIC ENCOUNTERS

Young or old, whatever your age, everyone enjoys the antics of the cunning Road Runner as he baffles and bemuses poor Wile E. Coyote. Or does he?...

This is your chance to really find out as you take on the role of Road Runner in this comic, all action extravaganza that recreates these nail biting chases and the fast moving excitement to perfection. Speed through canyons and along the highways following the trail of birdseed left for you to feed on (is this the first trick??) Dodge your way round the onrushing trucks keeping an eye out for the perilous mines and feather ruffling, leg bursting oil slicks. What dastardly plans has the sleazy Wile E. Coyote got in store for you as he lurks in hiding, cowardly awaiting his moment to enjoy a succulent roast of "Road Runner and French Fries". We're sure you'll overcome all the dirty tricks he can throw at you with ease, agility and grace and a saucy "Beep Beep". Overcome them is if you've got nerves of steel, the reflexes of a wildcat and the speed of the fastest bird on two legs, otherwise its sorry, goodnight and "Burp Burp"!!

Yet another offering from Mastertronic's MAD label, unfortunately it's a bad one. Why? Well the sound's nice, so are the graphics, but the gameplay, well, that's another kettle of bees. Why bees? Well let me explain...

You are the only surviving member of the Amuroto Royal Army. But that surprised you. In fact, instead of being your standard computer hero you're the opposite, you only survived because of a yellow streak the size of a 3 foot banana running down your back. Anyway the kindhearted Amuroto Government have supplied you with an Arachnus 4 armoured car capable of firing anti-anything bouncing bombs, which is pretty nifty, the only problem being you can only fire one bomb at a time which often means a long wait, as the bombs are still active after they have left the screen. The Government has also given you a grant totalling to $5,000,000 and they want the change back, the listless old so and so's. And what is all this in aid of? Well Amuroto's cities have been taken over by giant bees and you have to rid the planet and her lands of these insectoid foes.

You start the game with a map of Amuroto's cities with our car's slap in the middle. You can then muck around a bit until you decide on a city, which, if you wish to continue, you must enter.

The first thing about the city is that it is deserted, which is strange, it was under the impression I should be mauling my joystick while wading knee-deep in bee guts. After about ten minutes it sank in that the person who wrote the text in the game inlay was either the worst liar in the known universe, or I had overlooked something in the instructions. It turned out that I had in fact overlooked something in the instructions. I actually had a scanner! Wow maybe I'll be able to find a huge concentration of bee's and get down to some critical killing. I thought. I followed the directions as stated by the scanner, and to my amazement, I found a bee. I use the singular, because that is exactly what it was one single solitary bee. Ho hum, maybe I'll go after the queen, after all she should be the hive of activity.

So off I went, found a bee in a black box, called up a super bomb via the radio which is the only added extra get your car, fired up and went the queen, is that it? So I continued until I had disposed of all the remaining six-legged nose stingers on the level. Then I noticed my energy, not a pretty sight! Oh went the radio up went the energy, and down went my cash, by about $12,000. At this rate I thought I might possibly stand a fair chance of completing the game, but sanity prevailed, and my brain waved the white flag.

Lovely atmospheric music which restarts after every use of the radio, nice graphics, but not much in the way of gameplay. Perhaps you should do something else while it's on.

5 Overall
BATTLESTAR

C16 and Plus/4
Price: £7.95/cass

Well, well. Those wily old dogs at Tynesoft have gone and done *Uridium* on the C16. And it's not half bad you know. In fact, I'd go so far as to say it's the hottest May game since records began.

Do I really need to tell you about *Uridium*? It was released on the C64 last autumn (a pretty cool time in the software charts) and was so good it was no less than a CU Screenster, ruff said.

“BATTLESTAR”, it says here, “is a sophisticated combat zapping game — the best yet seen for the C16 and Plus/4′, I'd go along with that.

There's more, “Whist on patrol over the watery planet Nuljai” (sounds like some kind of gel for mouth ulcers) "you encounter an alien construction ring the planet”.

The “construction” is the work of the evil Cyrfots (sounds like a brand of over-ready crinkle cut chips that are golden brown and crispy yet melt in your mouth). The Cyrfots are out to steal the water from Nuljai, and the giant construction is in fact a cosmic water tank in which they plan to transport the life-saving liquid back to their home planet Bonjela (it's not actually called Bonjela — I made that up). The construction is pretty huge for C16 standards. It occupies 100 screens and forms the backdrop for the action, scrolling supremely smoothly across the screen as your patrol fighter cruises in either direction.

The object is to fly from one end to the other, a task which would be all the more easy were it not for the alien bombs which zigzag their way towards you.

While you are keeping an eye open for the bombs you might also have a go at avoiding the water pulses. These are stationary as they are attached to the construction, but there are lots of them and often their tactical alignment makes them difficult to avoid.

Bombs and water pulse mines can be dealt with by a quick (or long, depending on what kind of mood you're in) blast on the ubiquitous laser gun. If you don't blast them or get them out of the way you can kiss goodbye to anything between one and all of your five shields.

The biggest problem of all, however, is the construction itself, or to be specific, the encasements. Encasements are bits that stick up from the surface of the construction. Graphically, like the rest of the game, they are superbly done. The structure looks like a giant 3-D metallic spacecraft from which project the encasements, casting a shadow over the background.

As you gape in silent admiration at the beauty of it all you will smash

FRENESIS

C16 and Plus/4
Price: £1.99

Is Tony Takoushi a two hit wonder? His previous C16 games, *Hyperforce* and *Starburst*, were hot stuff, so I had high hopes for *Frenesis*, but I have to say it's more than a bit disappointing.

Frenesis features the same eye-boggling psychedelic graphics which owe much to the great guru Jeff Minter as its two predecessors. The gameplay has the kind of near-drathal simplicity that makes noughts and crosses look complicated. A cross occupies the centre of the screen running right the way across from top to bottom and left to right.

You must protect the cross from waves of attacking aliens which screen towards it from all sides of the screen. You do this with the aid of a long bar called a Statron, which, I seem to recall made more than a fleeting appearance in Takoushi's other games.

The Statron bar is composed of pink arrows which scroll in the direction of travel. So if you move it across the screen from left to right the arrows point right. That's quite important because the Statron will only destroy aliens if the arrows are facing opposite their direction of travel. So if you push the joystick up, the arrows will be facing the top of the screen and you can destroy descending aliens, push it down to get the ones coming from the bottom and so on.

The idea is to wipe 'em all out before they get anywhere near the cross, the reason being that every time that happens a new alien is created. If you let it happen too often, before you know where you are there will be more aliens than you know what to do with, and you can say goodbye to one of your three Statrons.

There are a few tricky bits. Some aliens take more than one clot with the Statron before they lay down and die. On the higher levels things that are called, and look like, plunger are made to dash for the cross. If they make it, it's another two aliens to deal with. Smart bombs, of which you have an unlimited supply on the higher levels, destroy everything in sight, but they only buy you time, they don't kill aliens.
Nice shoot 'em up from Geordieland.

into the aforementioned encasements, lose all your shields and have to start again from the beginning. Good job you got five ships.

Instrumentation provides you with scores (there's a two-player option), and the distance remaining to the end — 100 screens equals 2,000 Bonjellan miles. If you get so good that you can go the distance with your eyes closed you can make it harder on yourself both by flying faster and by turning around and going back to blast the bits you missed.

Ken McMahon

Yikes! Like what can we say...

for good.

That's all I can tell you about it because that's all there is. You sit there shifting the joystick up, down left, right, in an inevitably futile attempt to stop everything in sight reaching the cross, chasing a target number of aliens which is increasing all the time.

It's frantic (frenetic?) all right. But it's about as interesting as trying to fill the bath with the plug out. There really isn't any point to the game at all. After five minutes or so of actually trying to do something intelligent, like anticipate what was coming from where and when was the best time to hit it, I gave up and opted for wiggling the joystick like a looney. To my complete and utter non-amazement this second tactic was much more successful, at least on the first four levels.

Taking this theory a stage further I put the joystick in the washing machine which achieved a high score of 367551. If anyone else finds a domestic appliance that can do better, I'd be interested to know.

Ken McMahon

BATTLE

C16 and Plus/4

Mastertronic

Price: £1.99

The cassette cover depicts battle scenes from the Second World War. Spitfires and Messerschmitts fight it out over the channel, U-Boats stalk frigates, tanks roll relentlessly onwards and men in uniform look tough. Nothing is very strange, because the game has nothing whatsoever to do with World War II.

There are these two oil companies you see. Both of them are after the last deposits of oil in the North Sea. I guess the game is set in the future — next year sometime perhaps. Oil being what it is those guys are pretty keen to get hold of as much as they can, which means doing some serious damage to the opposition.

The serious damage entails the use of warships, submarines, helicopters, planes, rockets, guns, torpedoes and depth charges. The general idea is to blow the opposition out of the water so you can have the oil all to yourself — a suitably realistic political scenario.

If I was unkind I might say this was like battleships only not as good. It's like battleships only not as good.

The screen shows a map with the positions of your four oil rigs and the military hardware at your disposal — four ships, two subs, a plane and a helicopter. Enemy positions are also shown — you can play a friend (an enemy?) or the computer.

There are two phases to the game, input and action. During the input phase, with the aid of some fairly crude and difficult to understand icons, you enter all your move information. This includes details for each ship, sub, plane and helicopter. Where you want it to go and whether you want it to fire at anything are the two most important factors. When both players have input all their moves the game moves on to the action phase where the commands are carried out.

This is nothing spectacular. The screen is updated — everything moves one square in whatever direction you told it to. Any firing instructions are carried out and if anything is hit it is removed from the screen. A window at the bottom plays out a little animated scene of a helicopter, plane or whatever getting it in the neck whenever a direct hit is scored.

Battle is not a bad game, but it is certainly a bit tame. It needs something to liven up the action a bit, I found myself nodding off after about half an hour. If you play battleships in the free time between building Airfix kits you'll think it's brilliant, otherwise it's a bit of a downer.

I can think of two ways of improving it. Playing with a friend rather than the computer is definitely the thing to do. It's also more fun if you try to destroy your own oil rigs and blow up your own ships. The winner could be the first person to achieve total self-destruction.

Ken McMahon

Gotcha! The energy pod is nabbed, now scarper.

C16/Plus 4
Firebird
Price: £1.99

Thrust is living proof that you don't need one of the new mega-fantastic all singing all dancing 16-bit machines to make a good computer game.

Don't get me wrong - I'm not putting down the technological break-throughs that are going to revolutionise our hobby in the next few years. It's just that Thrust is a timely reminder of the cardinal rule of good game making - make sure the idea is a good one before you start programming. If the game does not contain a basic addictive element then the best graphics in the world are not going to get you coming back for more.

So what's so special about Thrust? Pure addiction - simple as that.

You pilot a triangular, line-drawn ship that has to scoop up a fuel pod from the planets' surface, destroy a nuclear reactor, and scamp before the core blows and the planet is destroyed. If that sounds easy believe me it is anything but.

What gives the game its challenge is the method of controlling the space ship. It has a momentum produced by the planets gravitational pull. When you pin the ship to the right it drifts in that direction - left and vice versa. A slight push of the thrust button and the ship surges forward in the direction that the triangular ship is facing.

It is this 'thrust' orientated ship control that gives the game its uniqueness and its name.

 Maneuvering the ship is a challenge in itself - but once you start picking up the fuel pods, spinning the ship to take out the guns that are strafing you and blasting the nuclear reactors the real fun begins.

Grabbing the fuel pod makes life more difficult still. The pod is attached to your ship by a long wire - ball and chain fashion - which swings around as you attempt to thrust pulling your ship in all sorts of directions.

Things soon get tough if you successfully complete the first mission. On level 12 the pod is hidden in a cave that you have to negotiate - taking out the guns that guard it. Both fuel and time are limited - so you need to become a real master of the controls if you are to be successful. The key to Thrust is to keep your 'thrusts' to a minimum as each stab on the key uses up valuable fuel. It is infuriating when you have almost completed a mission and are about to make good your escape to fall to the ground, thrusting furiously, only to discover you have run out of fuel, Thump space for another go.

Thrust was an enormous hit on the 8/4 last year - one of the best selling budget games of 1986.

Its graphic simplicity should have made for a successful conversion and in fairness the basic quality of the game is there. The regrettable thing about C16 Thrust is the flicker particularly on the harder levels. It won't hurt on this too much though as I still found it difficult to put down.

The sound effects are competent - nice quick fire sounds as you pummel the nuclear reactors and good retro rocket type noises as the ship powers forward.

Thrust will infuriate and entertain you. I thoroughly recommend it. At £1.95 it contains many hours of gaming fun for a wet English Summer.

- Single 3.5 inch floppy drive
- Mouse

Now in stock the New

AMIGA 2000 Series from £1095.00
The year is 2017, the Americans and the Russians have almost become good friends and they are about to rid the world of nuclear weapons. What future is there for computer combat games? Fortunately, the scenario in S.D.I, the latest release from Master Designer Software, is not so bleakly optimistic as this. As any decent, law-abiding American can tell you, the Commies are not to be trusted. A gang of "ruthless KGB fanatics" stage a coup d'état in the Soviet Union and in their crazed, bloodthirsty minds lies just one ambition: nuke America!

Some of us may applaud this noble undertaking and would find it most rewarding to engage in a computerised destruction of the US of A. Not this time, however. This is an American game, after all. Instead, the lucky player finds that he is one Sloan McCormick, Captain of the US Orbital Marines whose duty it is to blast the KGB rocket fighters out of the skies with his advanced particle beam weapon (his what?). Having accomplished this small task, the versatile McCormick must then repair the American Strategic Defence Initiative satellites, dock with friendly US and Soviet space stations and, because he's that kind of a guy, rescue his Russian lover, the beautiful Natalya Kazarina, from a "barbaric KGB torture squad".

What a guy!

Putting aside, if one can, the grubby little plot to this game, it must be said that S.D.I plays very well indeed. The graphics are stunning — at least as good as previous Cinemaware releases — with some of the best animation sequences I have seen on the Amiga. The sound is no less excellent. As well as the standard theme tune, the game has a sampled stereo simulation of a space craft passing from one side of the screen to the other.

Control is administered by joystick and mouse and it handles well. The sense of moving through space is quite convincing, while a challenging degree of dexterity is required to destroy the KGB fighters. I did feel that the joystick was inadequate in the docking sequences however. Here the mouse would have given greater manoeuvrability and more of a sense of the difficulties such an action requires.

The final sequence, a shoot-out with more Russians than there were on the set of "War and Peace", should satisfy the blood-lust of even the most Ramboish players. S.D.I is a likeable game in that it is varied and challenging. Better still, it looks and sounds great (I particularly like the scenic graphics of Moscow and the Kremlin). On the negative side, the politics behind it stink. With Messrs. Gorbachov and Reagan attempting to come to some sort of agreement on limiting nuclear weapons, we hardly need gung-ho nonsense like this.

S.D.I is a bit like the film Top Gun; it's a treat to look at, but ideologically it's phenomenally unsound. And at the price its economics are pretty dodgy too.

Francis Jago

(Fist II)

W. Cluey  
Holwood,  
Lo Down.  
(F-15 Strike Eagle)

---

**MEET THE TEAM**

We asked you to make a case for a conversion of an arcade game. Entries were of the highest standard but eventually we decided the winner was Mark Donaghy, of Adlington, Nr Chorley in Lancs.

Here's why:  
"The game I would pick to be converted is Out Run by Sega because it's the only game in which I can take my girlfriend for a spin without getting caught by the police for being underage!"

Mark wins a super day out in the capital city for two. As well as meeting the CU team he will also see the sights, enjoy a slap up meal, see a show, and then sleep like a babe in a top London hotel — and all on the Ed.

---

**GUNSLINGER COMPO**

Thanks to all cowpokes who thought they were smart enough to give the boys over here at CU a good laugh. We boiled the witty varmints down to three in the end. One that nearly took the prize was "You mean I've come all this way and there's no Gauntlet machine?" But in the end we gave the Levis to Neil Allen of Hull.
F.A. CUP COMPO

We’ve printed the results a bit late we know (for which we heartily apologise — last month’s results were dropped through lack of space) but that didn’t stop seeing the Wembley final. Runners-up receive footballs and copies of Brian Clough’s Football Fortunes.

THE MOST FUN-PACKED COMPUTER GAME
SINCE THE DAWN OF TIME

Wonderboy is here for your home computer! From the arcade original by Sega.

Wonderboy is a kid with a quest: to reach his girlfriend across treacherous landscapes and rescue her from the evil King. Burning boulders, tumbling boulders, poisonous snakes, killer frogs, and murderous blue midgets can all make for a short trip – but our hero can break open giant eggs to collect a stone axe, a guardian angel and other valuables to help him on his mission. A skateboard speeds up his progress and picking fruit provides bonus points – if you’re careful!

A fast, fun-packed game of skill and timing.

ACTIVISION ENTERTAINMENT SOFTWARE
and collected a set of spare bodily parts — only the best, you understand — from the local charnel house. Back home, he fitted his grisly jigsaw together, and then breathed life into it. Finding himself facing a huge and ugly being, he fled in terror, leaving his monster to its own devices. It wasn't long before it was terrorising the locality, and murdered the doctor's own sister in a gruesome way.

Don't expect to find the popular image of a bolt-through-the-head moronic monster when you play the game, though. That is not the authentic character of the monster, says Rod. "The tragedy is, that he was big but not lumbering. He was an agile creature, of great sensitivity and intelligence." Not at all like your Hammer horror film.

In the first two parts of this three-
adventure with screenfuls of highly atmospheric text, and thrown in a few puzzles to make the story work as a game. But the puzzles are really secondary to the narrative, which tends to drive the game, and so, on occasions, it pays to wait and let things happen.

An encounter with a grizzly, a hair-raising journey across a lake in a leaky boat, and a constant battle against the cold, take you through part one of this GACKed adventure. Rod places the puzzles nicely, so that they fit in between passages of high drama, without spoiling the tension.

Part two introduces a tragic couple, and in a scene full of pathos, you learn the horrific details surrounding the demise of a young man at the hands of the monster you are seeking. And eventually, you see him . . .

An unusual feature of Rod's multi-}

Wounded and heartbroken, you stagger away in pain, expecting to die — unless you can cure your festering wound. In Part 3, to progress the game you need to watch, listen, and think, to build up your IQ, to survive.

My main criticisms are the slowness of the response, and the vocabulary, which is rather difficult at times. The average adventurer is not above becoming a human thesaurus now and again, and it is true that eventually the right words will be found, without too much difficulty. What irks a bit is that at times of danger, the narrative doesn't forgive you for selecting something that is unrecognised, and relentlessly progresses the plot. Thus, getting the right words in a limited number of moves becomes a matter of life or death.

If you like gothic horror, you are going to like Frankenstein, the

by Keith Campbell

adventure. Rod has again shown that the formula of going back to the original, produces an excellent piece of interactive fiction.

Spooky graveyard sets the tone on the title screen.
Castle of Terror is an old adventure from Melbourne House, that has some very strange features about it. None more so than a problem that has bugged readers for many months. It needs bother them no longer.

The problem is in killing Dracula. Everyone knows that this is done with a stake, of course. In Castle of Terror, the stake is formed by breaking the spear. But many players find that once the spear is broken, the resulting stake does not have the desired effect in seeing off old Drac.

A Valley reader calling himself The Elf, has defined the answer. To make sure that the stake will kill Dracula, you must have previously attacked him with the spear. This causes him to turn into a bat, and he flies away. But for some reason, it also ensures the potency of the stake later on in the game.

The Elf runs a free adventure help club, and if you would like to join, merely send an SAE to him at 26 The Gap, Marcham, Abingdon, Oxon OX13 6NJ.

If Caroline Jennison had included her address, I would have gladly replied to help her out of her dilemma in Quest For The Holy Grail, just as other adventurers receive help from The Valley. Carline has the shrubbery, but when she goes into the castle, she can't get out again. Look in the clues section Caroline, and you will find the answer!

Martin Maskell is lacking the password to satisfy the Guardian of the Ring in Ring of Power. Can anyone help him on the fifth level?

Draculas (the vampires) seem to be all the rage this month. Having finally plotted the demise of the Dracula in Castle Of Terror, there is a long queue forming to get rid of a few others.

Helping out with a Castle Dracula 5 clue (see the clues section) Darryl Laidler of Morpeth says: "At least with that game you know the goal is to kill Dracula! But what exactly is the object of Ultimate Adventure?"

"Could you please send me the clues for Dracula, as I have given up trying to play," writes M. Potten of Theford. That is one thing we can't do in the Valley. MP! It's not necessarily that we don't know the answers, it's just that it is not the way Valley Rescue works. We aren't in the business of sending out complete solutions or comprehensive hint sheets.

The system is that you tell us where you are stuck, and we will try to move you along a bit, with an appropriate clue. So don't give up, M. Potten, pour our your troubles to us, and we will do our best! Write to me at The Valley, Commodore User's Priory Court, 30-32 Farrington Lane, London EC1R 3AU, and one of us, that's Daniel Gilbert, Adrian Bott, Paul Coppens, and myself will get back to you.

**LEATHER GODDESSES OF PHOBOS:**

To trap a trap, camouflage a fragile hole cover, and lure it!

**ADVENTURE QUEST:**

Let out the wind to dispose of the Djinn.

**ZORK 2:**

A three-necked collar for a three-headed dog.

**KAYLETH:**

Swing the rod for a bit of de-zepping!

**THE PAWN:**

You can do two things with one key, but not in the same game! After quenching a thirst, don't be stumped for light. Primary colours mix to white.

**QUEST FOR THE HOLY GRAIL:**

Wedge the door by dropping the wedge.

**ZORK 1:**

For a hellish excursion, ring the bell, light the candles, and read the prayer in the book.

**CASTLE DRACULA Adventure 5:**

To get down from the wall, make sure you have a flashligh. At the twisty turny bits go N, N, S, S, E, E, W.
WHERE IN THE WORLD IS CARMEN SANDIEGO?

GrA
Eagle Soft
64/128
Price Disk £19.95

Carmen Sandiego is some kind of a crook. We are not talking petty theft — I mean real world treasures, like Chandli's glasses, and the whole ceiling of the Cutina Chapel. Here is your chance to come to the aid of Interpol in tracking down and arresting the members of his fearsome organisation.

You start off as a plain Rookie. You are told what priceless article has been stolen, and from what city. That city becomes your first base, where you are able to make your initial investigations, and then relentlessly pursue the fleeing criminal.

Your case starts on a Monday at 9am, and you have until 5pm on Sunday to complete the case — after all, you wouldn't want to be late for work on the following Monday morning, would you?

So how do you achieve success in this detective game? To start with, I have not been one hundred percent correct in giving the impression that this is purely a game of detection. It is just as much a game of general geographical knowledge. Nor is it one hundred percent an adventure. Input is selected by text icon with a joystick.

You have four main choices: list possible destination cities, to depart by plane, to investigate, or to visit Interpol. Obviously you will have to do a spot of sleuthing first, and the

Information about the city of New Delhi. ▲

Jet over to Cairo in pursuit of a lead.

Investigate option offers you a choice of three locations, such as a library, bank, hotel, market, and so on.

You can choose any one of these in turn, and each results in a comment from someone at the scene. Their chat may give you clues on the appearance of the suspect, or to where he is heading next. For example, a bank clerk might say: "He changed his money to Kronor. He had an ugly tattoo on his right arm."

A trip to Khatmandu might be worth the trouble.

From there, it's straight down to the Interpol office to enter the information about the suspect on the computer. Gradually you narrow down the list of suspects, and only when there is one possible suspect left, will you be issued a warrant for an arrest.

Meanwhile, you may use other clues to decide where to fly from the list of possible journeys. If you follow the right route, you will eventually catch up with the criminal — but if you haven't obtained a warrant it will all have been in vain, and the case will end without an arrest.

As you take on more assignments, and increase the number of arrests, you are promoted from rookie to
THE BIG SLEAZE

GrA Pirhana Software/
Delta 64/128
Price Cass. £9.95

There has been a spate of comedy crime adventures recently, and Delta 4's The Big Sleaze follows St. Bride's Buggy, and Lever/Jones' Dodgy Geese. This one is a spoof on the fictional American Private Eye, and despite the occasional lapse into an English-type joke, the game maintains the flavour of its subject fairly faithfully.

Private Dicks, as Fergus McNeil inevitably calls them, always have squally offices, cluttered desks, and wear a truc. They are often approached by ravishing females in a highly emotional state, usually blind, and about 30. The Private Dick is always reluctant to take on the case, but nevertheless, always does.

There's not much different here. She kicks the door in and checks that you are a private detective. "Of course I am," you drawl. "What did you think Private Dick was short for?"

"I don't know," she says thoughtfully, "maybe your mother made you wear tight underwear when you were a kid."

And so, accepting the cheque you set off in search of her father, a millionaire who she hasn't seen for years. He's failed to turn up at a re-union dinner with her and, after waiting a fortnight for him, the poor girl became suspicious that this was more than just a question of slack punctuality.

Getting on the trail is hampered by the local kids, out for revenge ever since you bashed their school dinner money racket. But before long you are visiting Joe in his luxury restaurant, and Ben in his very pink apartment, before pushing on to explore the interior of some fascinating ventilation ducts.

Fergus is getting more cunning in his old age, and has provided a very limited carrying capacity for our hero. There's lots of goodies lying around that any self-respecting Dick would like to carry along with him on a case like this, but it's deciding which ones you really need that causes an initial headache. In handling the inventory, Fergus makes realistic use of wearing items, and putting things in other things, to slightly expand the amount that one can carry.

There are some bright and cheerful graphics at various locations, and the vocab, on the whole, is not too fuzzy. Quilled, the game has an instant response in text, and is quite speedy even when a picture is displayed. As it is now almost a standard for Delta 4 adventures, there are three parts, each of which must be completed to progress to the next.

Every now and again, if you are not making much progress, the game gives you with a criticism of your ability to solve the case. This would be annoying, were it not for the fact that there is a ram save feature, as well as tape and disk save. So it pays to save to ram every now and again, and then reload if you are forced to quit.

The Big Sleaze is Fergus' best to date. A pity about the price though, which, at £9.95 is a couple of pounds over the top for this type of adventure. (Take note, Pirhana — MacMillan's can surely afford to give as good a deal as CML?) Nevertheless, if you like a good spoof, then you'll enjoy Sleaze.

Things start hotting up in the air shaft.
You're going to be pretty choked if you've already got Art Studio, because Rainbird has gone and improved it. Unlike the margarine ads, the new formula really is tastier. And what's more, you get the original version for free.

Art Studio originally appeared on the 64/128 last September. And although we gave it a good review, there were quite a few areas in which we thought the program could have been improved. Influential as we are, Rainbird seems to have taken those criticisms to heart because they've paid the most attention to these very areas in this new 'Advanced' version.

But there's more to Advanced Art Studio than that. A lot more has been added, the program is easier to use and that makes it much more creative than the original version. It's supplied either on tape or disk, and you get the original program thrown in free.

Like the older version, Advanced Art Studio uses the same window and menu display. The nice, simple presentation means you can start using the program without bothering to read the instructions. It's also joystick or mouse driven. I know mouses (mice?) are expensive, but they're by far the best way of using this program.

All the drawing functions you'd expect - like shapes, lines, fills, patterns etc - are all there, and so is the Windows function that made Art Studio so special.

Once you've defined a window (any part of your drawing) you can do loads of clever things with it. You can cut and paste, rotate, resize, make multiple copies and flip them horizontally or vertically. Unlike the original program, the windows can now be saved to tape or disk so you can build up a library of pictures and elements.

But the biggest problem with Windows isn't solved - they must be defined as a square or oblong shape. The problem is that the bits of a drawing you want to move around are invariably irregular. But maybe I'm asking too much.

Art Studio's greatest improvement is in the use of colour. The programmers have built it in two functions: Priority and Exclude. Any or all of the 16 colours can be set in the Priority and Exclude tables. How it all works takes some grasping, but here's an example to illustrate their use. Say you'd drawn a multicolour picture and you wanted to take a chunk out. Using a window, you'd have to cut and paste everything inside it. By entering the colours you want leaving behind in the Exclude table, you take out only what you want.

The Priority table works in a different way, giving some colours precedence over others. Say you were pasting a section on top of an already existing drawing, the program will allow the colours you set as priorities to remain uncorrupted.

But there's more classy stuff with colours. Advanced Art Studio now gives you multicolour brush and fill patterns. There's twelve of each and they can all be edited very easily and saved to tape or disk. Using the largest multicolour brush (three colours and a transparent one) you can really do the kind of things the Amiga does so well. Am I joking? No, not really.

In general, use of colour is remarkably good, doing detailed work in Magnity mode is now much easier. Apart from being able to work in x2, x4 and x8 magnification, you can now toggle the full-size screen on and off from any of the enlarged screens.

The programmers seem to have solved the perennial problem of adjacent fill patterns 'bleeding' into each other - but you still can't fill on top of a fill.

What's next? Oh yes, Text mode - that's been well and truly overhauled. Instead of the crummy computer-type font you got on the old version, you can now use the 64's built-in font or a choice of two from the tape or disk. They can be used both in bold and italic form. If you're not happy with that, a font editor is provided.

Better still, individual characters and whole fonts can be rotated in any direction (great for writing Russian) and text can be written on screen backwards or forwards, up or down. Character size can be changed both upwards and across and you can vary the spacing. You wouldn't even find that on a word processor.

Accuracy is about as good as it will ever be on the 64. A much-needed display of co-ordinates is now provided on the top right of the screen to aid accurate positioning.

The co-ordinates work in any of the magnity modes too.

Lastly there's the manual. As usual, Rainbird have produced useful and informative documentation in the form of a 56-page ring-bound manual.

There's only one point I'm still not happy with, the printer bit. The program defaults to the MPS 801 printer - and there are no problems with that. But you have to customise the program to make it output to any other. And that involves answering a string of baffling questions, many of which you won't find the answer for in the user manual.

That's done because the printer must be set up to print in the proportion and the density to give a realistic representation of what's on the screen. Still, it's a pain.

Not to end on a critical note, Advanced Art Studio is a very good program indeed. All credit to Rainbird (cheers, Harry) for bothering to improve an existing program and still managing to sell it reasonably cheaply. If you didn't buy the original, now's your chance.

Rainbird's Advanced Art Studio

Sing along now, Readdy, altogether ‘Oh we do like to be beside
the sea side, oh we do like to be beside the sea’. You betcha
we do especially when the new re-vamped sea side arcades
are packed full of the latest coin-ops going. But that is only part of
the story. As the sea side arcades tend to have a higher turn over
during the holiday season the cost of playing is generally lower. Next
month Arcades makes a welcome break from the seedy West End of
London and heads for the sea. I am not saying where we will be but
should you spot Nick Kelly, Mike Pattenden, or the Ed at the seaside
in the next few months then don’t forget to say hello. We will be very
pleased to meet you. What do you mean how will you recognise us?
We’ll be the people with the highest scores of course — and we will
probably also be wearing trendy CU T-shirts. Seaside Special will
front the most complete survey of the state of the countries’ sea front
arcades ever published in the UK. Don’t miss it.

Also in this Summer bumper issue are a guaranteed 116 pages,
reviews of Thai Pan, the Last Ninja, Thing On a Spring II, Summer
Events C16 (exclusive) and the latest Amiga A500 games. This
sizzling Summer issue will leave all the ordinary magazines in the
shade.

Yours for £1. Buy it — or for every be one of those beach wimps who
has sand kicked in his face.
Three Up & Dozens to Play

What you learnt on the original Leaderboard courses will really be put to the test on these exciting challenges.

Leaderboard
The exciting world of professional golf, realistic 3-D animation, multiple 18 hole golf courses and 3 levels of play from amateur to touring professional.

This is the sports simulation of the year – if not the decade. Zzap 64.

Leaderboard Executive Edition
From sports simulation of the year progress to another dimension of gameplay, another experience in excitement and graphics as you battle to master sandtraps, trees, water hazards and rough.

A game that’s frightening in its demand and realism, only the mentally tough will survive these encounters unscathed.

The 64 version of Paperboy is still in the charts six months after it was released, and now the C16 version looks set to join it. That could make Paperboy one of the year's biggest sellers by December.

To mark the success of the game and celebrate the launch of the conversion Elite have generously put up a new Commodore 64 for someone who wants to upgrade. Plus there's twenty-five copies of the C16 game for the runners-up.

All we want you to do is answer three dead simple questions about newspapers.

1) A new Sunday paper was launched in April its name was?
   a) Sunday Sport
   b) News on Sunday
   c) Soaraway Sunday

2) The publisher of the Daily Mirror is
   a) Robert Maxwell
   b) Rupert Murdoch
   c) Eddie Shah

3) Which paper is nicknamed 'The Thunderer'?
   a) The Sun
   b) Meteorology Monthly
   c) The Times

First correct answer out of the bag wins the computer, then the next twenty-five correct entries win runners-up prizes. Send your answers on a postcard to Paperboy Comp, 30-32 Farringdon Lane, London EC1R 3AU. Entries to arrive no later than 15th June.

ROADBLASTERS
Atari (3/5 × 10p)

Roadblasters is one of the ever-increasing fleet of coin-ops into which you insert not only your hard-earned cash but your body also, and no doubt you'll find it priced accordingly in your local pleasure- dome. Happily, however, you're not just paying for seating-space in the long, sleek and completely enclosed cabinet — Roadblasters really is a lot of fun to play.

With a choice of three playing levels, a highway twisting through constantly changing — and graphically striking — scenery, day-fading-into-night effects and a suitably groovy soundtrack, there's more than a passing resemblance to pure driving games like Out Run. But Roadblasters is a shoot-'em-up too, and that's what really makes it fun and value.

You start out with standard cannon, but you'll increase your fire-power dramatically if you manage to catch the special weapon which the occasional passing aircraft drops in your path.

Driving along you try to blast orange cars, motorbikes and roadside gun batteries while avoiding indestructible obstacles such as purple cars, land mines and, of course, missiles from the gun batteries.

You can replenish your fuel supplies by driving over the red and green globes which remain after you've dispatched various other vehicles, so in your eagerness to keep that pedal hard against the floor and those cannons blazing, don't forget to pick up as many of these life-prolonging spheres as you possibly can.

The handling and graphics makes Roadblasters a real pleasure to play. But what pleases me most about it is that, assuming you collect your fuel globes and stay alert, you can stay alive and active indefinitely — or at least for long enough to justify your initial steep investment.

My one criticism of this immensely playable coin-op is that I suspect that, with practise, arcade supremos will soon master the hazards that confront them, and may find the going slightly predictable. For now, Roadblasters throws quite enough obstacles in my path to keep me fully occupied. This is one game I'll be coming back to on my own time.

SUPER HANG-ON
Sega (3 × 10p)

Another new arcade game featuring a wild console with its deluxe version is this sequel to the motorcycle hit, Hang-On.

Once seated on your saddle, you get to choose from a selection of different courses, varying in difficulty, and four (yes, four) alternative soundtracks, before you even get to the starting line.

Super Hang-On's most notable feature, though, is the turbo button. Whenever a red light flashes in the corner of the screen, you can, with a flick of your thumb, go from fast to very fast indeed. The handling is superbly realistic, and you have to continually make adjustments to ensure that centrifugal force doesn't send you hurtling off the tracks and into a boulder or a road-sign.

No complaints about the state-of-the-art graphics, either, with a variety of slowly-unfolding landscapes appropriate to the part of the world in which your course is situated and some highly believable sunsets.

So just why do I find this beautifully-finished game so boring? Well, basically all you do is ride around a track, trying to stay on the tarmac and avoiding other riders. The harder levels bring more twists and turns, and a more crowded motorway, but other than that this game doesn't really develop at all. Perhaps I've got a low boredom threshold but after a few rides on Super Hang-On, I found myself itching to play something else with a bit more action.

My other major quibble is with value-for-money: unless you're Barry Sheene's smarter cousin, you're going to find your game ends very rapidly indeed. You're playing against the clock here, and extended plays are very hard to come by. The basic playing time is ridiculously short, and one slip seems to rule out your chance of spending more than a paltry minute or two on the road.

Super Hang-On is undoubtedly a very accurate representation of what it's like to drive at quite high speeds on a motorcycle around a twisting track — trouble is, that...
Phew! After all that roadway action, I decided what I really needed to relax myself was a nice air combat shoot-'em-up. And so I approached the gleaming new Lock On console, took a firm grip of the joystick, and inserted the necessary... Ten minutes later, sweat-soaked and green-faced I staggered out of the arcade. Whatever else Lock on may be, relaxing it is not.

You’re a fighter pilot flying over a brilliantly psychedelic landscape. Your craft handles uncannily like the real thing must do — pull the joystick back and the ground disappears and you’re staring at the great blue yonder, jerk it sideways and you’ll find yourself banking that way.

The sky rapidly fills with zany enemy fighters, bizarre gun emplacements and fortresses which litter the ground beneath you like so many poisonous multi-coloured toadstools.

Both your cannon and their weapons behave in an unusually realistic way too, and missiles drift towards their targets rather than streak.

This has advantages and disadvantages for you — you will (just about) have time to avoid the approaching tracer, assuming you notice it in time (which believe you me, on a screen this bright and busy, is no easy task), but you’ll also have to fire at where you think an enemy will be by the time your missile lands.

The overall effect of the combination of realistic aircraft handling and graphics which make The Beatles’ famous pop-art cartoon The Yellow Submarine look like Crietax by comparison is to give you a fair dollop of thrills laced with a slight touch of seasickness.

Hardened cynics like Mike 'Michael Gorbachev' Patterson, with many hours flying time under their belts, may say that, if you take away the goofy colours Lock On is just a fairly mundane variation on the old Mach III theme. But if, like me, your idea of a wild time is to don paisley trews and love beads, brew up a pot of herb tea and cool out to the sounds of The Thirteenth Floor Elevators, Lock On might be right-on way to lose bread, maan...

Eugene Lacey

I wasn't as sick as a parrot after playing Kick and Run but I wasn't over the moon either. The game idea is brilliant. I mean you think it could be better. One thing I do think is that this snide coin-op graphics that you and three of your mates can play. Troublesome. A national event. Many of the moves that you are supposed to be able to make don't work, for example heading with your head. Very irritating. It is also quite difficult to get your man back to tackle once you lose possession. No, I can't recommend it.

Mike Pattenden

I think that the game comes into its own with four people playing each other, especially if everyone's at about the same level of skill. Against the computer you're made to feel a bit of a donkey since it does such spectacular things. I also note that the game designers were ignorant of, or ignored, the rules at some points which had me screaming 'Referee!'. At one particular point an opposition player came diving into the area and the referee, scoring from the goal itself (particularly irritating. But I did like the slide tackling.

Nick Kelly

Not a bad concept, nice Andy Capp graphics, but what happened to playability? There are five players on each team, and the one you control continually changes, so you spend a lot of your time just trying to work out which of the jumble of onscreen players you are. The controls are pretty unresponsive too, so even when you do finally 'find' yourself you're not able to do anything the final with your slow-moving alter ego. Even simple running with the ball is frustratingly difficult, and as for the 'trick' passes they're just too hard to do. Forget. Don't bother taking on the computer, either - at least against fellow fans. Like 'Mick' Mike and 'Fast' Ferdy you've got some chance of winning.
Become the WIZARD and conquer the Colour Creatures; Stir the spell and zoom around the planets in your space transporter.

WIZBALL... a fascinating new game, packed with stunning graphics and thrilling action.

**SDI (SEGA)**

With single-player and two-player team options, this is a two-phase shoot-'em-up featuring trackerball gunsight control, in which your mission is, as the title implies, to fight the defensive side in a nuclear war. During the attack phase, you drift about the stratosphere taking out horizontally-scrolling enemy missiles; and the defence phase finds you desperately picking-off the slowly-descending nasties: miss one and BOOOOOOM goes everything. Brilliant introductory screen graphics (see pic.) are, alas, not quite matched by those in the game itself, and quivering pinkos like ourselves find SDI's underlying concept a bit too realistic for comfort.

**COMBAT SCHOOL (KONAMI)**

Currently being site-tested in selected arcades, this new Konami release seems certain to be a smash hit. You're a raw recruit thrown into the tough competitive world of a Westpoint-style military training camp, and you have to prove yourself in a series of trials, pitted against either the computer or another player. Using a tracker ball for movement plus buttons for various other actions, you have to complete an assault course, spar in the unarmed combat ring, shoot at the now-you-see'em-now-you-don't targets on the firing range, arm-wrestle and go cross-country running, to name but five of your routines. Stunning graphics voice and sound-effects are also features of this white-hot coin-op.
Mastertronic in Arcadia

Mastertronic, the world's leading producer of budget games, have announce a move into the arcade games market. Two arcade consoles are planned for release in the near future, probably by the end of the summer. The release of these two coin-ops — Rockford and Road Wars — is notable for several reasons.

First of all, the new company set up by Mastertronic to produce the games, Arcadia Systems Int will be the first British company to develop, manufacture and market their own arcade games. Up till now, practically every coin-op in Britain's arcades has originated either in the U.S.A. or Japan.

Secondly, Mastertronic are using the Amiga hardware system in their coin-ops, as opposed to developing their own.

Geoff Heath of Mastertronic explains that their decision to get into the coin-op market was partially due to the availability of the Amiga.

"I think we saw an opportunity with Commodore's technology to write an arcade game using the Amiga board as opposed to the traditional PCB boards.

For one thing, Amiga represents the latest technology. And for another, in terms of the length of time it takes to write an arcade game, the Amiga has a great advantage in that it takes about half the time that it would take using the traditional method, without any appreciable loss in quality, in fact with superior quality, in many cases."

Meanwhile the Rockford console will be none other than a conversion of the little game featured in First Star's addictive Boulderdash series. Mastertronic's games will be competing in a highly-competitive market, but they feel that their proven strength in game design for the home computer market will serve them well and help them survive.

"I think we will compete with them," Geoff Heath says of the well-established American and Japanese arcade games manufacturers. "I'm not going to sit here and say we'll do better than them, because they're very good at what they do. But in terms of quality of product, we will be competing with them.

And if sales of Rockford and Road Wars confirm the "great interest" that Mastertronic say the industry is expressing in these new British coin-ops, there'll be more to follow soon — apparently there are about ten more Arcadia games in various stages of development.

It was as we scrabbled through the thirty-seventh mailbag bulging with your Meet-The-Team compo entries that the thought struck us: why not work out a readers' top five? So here they are, the arcade games y'all jes' luv to play the mostest:

1. OUTRUN
2. ROADRUNNER
3. PACLAND
4. GRYZOR
5. SALAMANDER

In fact, we enjoyed that so much, we thought we'd like to run a readers' chart every ish. So why don't y'all jot down your current to five coin-ops and send them into: COIN-OP CHART, Commodore User, Priory Court, 30-32 Farrington Lane, London EC1R 3AU. Anyone whose top five is the same and is the same order as the average will become the proud owner of a superb CU sweatshirt — please state whether you'd like Small, Medium or Large on your chart.

TOTAL BACK-UP POWER CBM 64/128
PERIPHERALS...THE FINAL FRONTIER...OUR MISSION...TO BOLDLY GO WHERE NO OTHER UTILITIES HAVE GONE BEFORE

CAPTAIN'S LOG...THE TOTAL SOLUTION TO ALL YOUR BACK-UP NEEDS...THE ULTIMATE BACK-UP CARTRIDGE HERE NOW!!

REPORT ON FINDINGS
Action Replay Mk III is more powerful, more friendly and will back up more programs than any competing utility by taking a 'Snapshot' of the program in memory so it doesn't matter how it was loaded from disk or tape, at normal or turbo speeds...the result is the same - Perfect!!! Amazing!!!

STARBASE UPDATE
- Simple to use: just press the button and make a complete backup. Tape to Tape, Tape to Disk, Disk to Tape - THE PROCESS IS AUTOMATIC - JUST GIVE THE BACKUP A NAME.
- All backups will re-load at turbo speed independently of the cartridge.
- Dual speed tape turbo system: Programs can load up to 5 times faster than commercial turbo - that's over 10 times normal Commodore speed.
- Freeze the action then view the program with the monitor feature. Accurately for entitle live are then restart the game or backup - ideal for 'improved' versions of your games.
- Picture Save. Save any multi-colour, hires screen to disk or tape. Compatible with Blasting Paddlers, Koala, Slideshow etc.
- Fully compatible with 1541, 1541C, 1570, 1571, and enhancer or any GEM compatible data recorder.
- For DCO, 54C, 128, 128D (in 64 mode).
- Unique Speed Monitor. Freeze the action and view all the sprites, multiple sprite animation scroll across the screen. Save Sprites to disk or tape. Customize your games by loading sprites from one game to another - then restart the program or make a backup.
- Compatible with fast DOS and Turbo ROM systems.
- Backup process in turbo speed - faster than any rivals.
- Special compacting techniques. Each program is saved as a single file.
- Transfers montage tape programs to disk - more than any other cartridge - even the extra stages are turbo-loaded - a unique feature.
- Sprite Killer! Make yourself indistinguishable by disabling Sprite collisions in games.
- Fast disk format (20 seconds).
- Built-in unstoppable reset button.

ONLY £29.99 POST FREE

PLUS Built In FASTLOADER
Action Replay III even has a built in disk fast loader which speeds up loading 5 times. Uses no memory - available to the system. You could pay £20 alone for this feature.

WARP 25
BREACHES THROUGH THE 10 SECOND BARRIER!
Action Replay III now comes with an amazing value Disk Bootloader that will load your backups at TWENTY FIVE TIMES normal speed. The fastest disk turbo on earth! There are NO CATCHES - WARP 25 works with ALL your games. Works with any disk drive! No - preset required - no hardware modification necessary - no user knowledge required - programs to interfacing immunity, loading time - 9 - 11 SECONDS, for a typical game saved by WARP 25 in conjunction with ACTION REPLAY III. Then tie this for the COMPLETE load process from start to finish. Readout is pure INDEPENDENT of the cartridge or any other backup. Compare these (accurate) figures with some other backup systems.

- NO

All purchasers of Action Replay III will receive WARP 25 FREE with their cartridge. Existing Action Replay III owners can obtain WARP 25 disk turbo by sending £2.50 postage free. (No need to send your cartridge). OR obtain it FREE on the Enhancement Disk (£7.95).

THE ACTION REPLAY ENHANCEMENT DISK
- The fastest disk loader to date to mirror outputs for non-enhanced programs eg: SimulGames, Acorn Assembler, Superjoy, VAXSim, etc. Works with all systems. 30 times faster then any other program system. No user knowledge required. Turbocharged throughly. NO. Standard cartridge turnaround time made faster by a factor of three to four times. Includes file copy and disk backup utilities. PRICE £7.95 with full £7.50 in a account to date 30th March for bonus from loading screens, hires pictures etc. Written by Action Replay. Great entertainment.

PERFORMANCE GUARANTEES
- 100% Success! Real Claims! Who's Kidding Who? Action Replay Mk III will backup any program, whether any other cartridge can backup! Backup is faster than any other cartridge, has slower tape speed, less CPU time on smaller systems. Includes Turbo-Tape for example, which uses more disk space, requires more disk space, adds 7 new disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture. Sprite or sound features and more! It is simply built in disk loader, no picture.
**DISK DEMON £64.99 POST FREE**

“The world’s fastest parallel operating system”

- Loads a typical 380 block program file in under 3 seconds!
- 60x faster load (360 files).

**PLUS AN ADVANCED COMMAND STRUCTURE INCLUDING:**

- Fast format — up to 60 tracks (740 blocks).
- 16 function keys: hot, run, load, directory, format, save, cold, verify, etc.
- Fixed will load files up to 250 blocks (other similar systems will only cope with 300 blocks).
- Number conversion: Reset.
- Unique built-in file copier will copy files up to 250 block size: lightning — multiple copy options — perfect for copied Action Replay files.
- Highly compatible with commercial software — can be switched out for non-compatible programs.
- Works for use with Action Replay 3 — a typical 80K backup will load in about 5 seconds — yes 5 seconds!

**FAST HACK’EM™**

The Ultimate Disk Copier/Nibbler for O64/128

- **MIDI-MODULE SYSTEM — ALL ON ONE DISK**
  - SINGLE 1241 MODULE
  - AUTO NIBBLER: Copy an entire protected disk in 3 minutes. Automatically extracts type of protection and writes it on normal disk to produce working copy.
  - NIBBLER: Copy an entire disk in 2 minutes. As above but parameters can be set manually.
  - DISK COPY: Copy a disk in under 2 minutes.
  - FILE COPY: Copy and file in 9 seconds.
  - 1241 PARAMETERED MODULE

This is the module that gives Fast Hack'em its power. The parameters module contains dozens of “Parameter Keys” that are used to unlock those heavily protected programs. Each parameter is designed for a particular software brand or even a particular program. Other copy programs may make strong claims, but without special parameters they just can’t copy. Data will be offering updates to Fast Hack em on a quarterly basis, featuring 60-90 new parameters plus other improvements as they’re made. Prices to be 66 plus 63 kid.

- SINGLE 1241 PARAMETERED MODULE
  - AUTO NIBBLER: Copy an entire unprotected disk in under 1 minute. Features auto track/sector analyzer.
  - DISK COPY: Copy entire disk in 30 seconds with verify.
  - AUTOMATIC BINARY COPY: As above but with completely automatic operation. In fact once set up doesn’t even need the computer. A must for duplicating disks on a large scale.

**ONLY £19.99**

**DISK MATE II**

The Disk Utility Cartridge

- Disk loaded cartridge.
- Works with Disk/Action Replays.
- Speeds up other DOS functions including verify, scratch.
- Enhanced command set — over 30 new commands.
- Raster display — Diskmate plugin inside the 1641 and the new operating system chip plug-ins inside the O64/128. Fitting takes only minutes and usually requires no soldering.
- User retractable supplied free — you could pay £50.00 for this alone.
- Supplied complete — no more to buy.

**ONLY £39.99**

**MOUSE**

- 2MB O64/128 mouse.
- 3D movement.
- Works by minimising joystick so will work in any joystick compatible package.
- Supplied in the Action Replay II for £24.99

**CARTRIDGE DEVELOPMENT SYSTEM**

- All the necessary parts to produce an O64/128 auto-start cartridge.
- Quality PCBs.
- Injected moulded cases.
- Eject switch.
- 36K EPROM.
- “Cartridge Handbook” gives full details and tips on building and configuring the cartridge for many uses.

**ONLY £12.99**

**MIDI 64**

A Full MIDI Interface for the O64/128 at a realistic price

- MIDI in.
- MIDI thru.
- 2 x MIDI out.
- MIDI compatible with most leading software packages including: Sequel, JMS, Advanced Music System, Synth, Steinberg, etc.

**ONLY £29.99**

SMART CART

38K or 32K printed ROMs

Next you can have an 8K or 32K cartridge that you program like RAM then acts like RAM! £14.99

SMARTCART UTILITIES

A secret of utility programs for use with Brainbox. Simply load in the program and you have a powerful utility. When you have a different requirement - load in another program and you have a new cartridge. The process takes seconds, and can be repeated any number of times. We intend to release a range of programs. The first available are:

DISK MATE II

All the features of Diskmate II (see ad). Loaded in seconds — with full instructions. ONLY £9.99

PRINT IV

Now you can turn your MPS 801 into 4 printers in one!!

Only £19.99

BLAZING PADDLES

A complete lightpen/graphics illustrator package.

$24.99

TOOLKIT IV

The ultimate disk toolkit for the 1640/1441

ONLY £12.99

RAM DISK

Run your Smart Cart into a 32K RAM disk.

ONLY £9.99

ROBOTek 64

Robotek 64 is a comprehensive hardware/software package which enables you to connect your 64/128 to the outside world.

ONLY £39.99

DIGITAL SOUND SAMPLER

The new sampler allows you to record any sound digitally into memory and then replay it with outstanding effects.

ONLY £49.99

COM-DRUM

Digital Drum System

ONLY £29.99

COM-DRUM EDITOR

38 drum sounds supplied on disk to enable you to construct your own drum kit.

ONLY £4.99 disk only
Screen dump

I have a C16-64K and I am trying to write a screen dump program to dump the screen to tape or printer, but I am having trouble converting the CBM codes to the ASCII codes Please, please help...Anthony Downer, Ladywell, London, SE13

Because the CBM character set is really 2 characters set in one, the codes are different depending on whether you have upper case plus graphics (Set 1), or upper and lower case (Set 2). The other problem is that the screen character codes are not necessarily the same as the values you obtain in a GET statement for example. If you look on pages 176-177 of the manual you will find the screen codes corresponding to the letters. To convert Set 1 to ASCII you add 64 to any screen codes below 32. All other codes (below 32) are invalid. However, if you are using upper AND lower case then the conversion is more complicated, because in ASCII the lower case letters have higher values than upper case letters, whereas on a CBM machine they are the other way round. Therefore, to convert Set 2, use the following formula: If the screen code is 0 then add 64. If the screen code is between 1 and 26, add 96. If the screen code is between 32 and 90 then don't change it.

Don't print anything outside these values since many will look like control codes which may cause the printer to do something funny like change text size. In all cases, the screen codes are the values obtained by PEEKing a screen location and the result of the changes will be to give you the correct ASCII codes. One point to bear in mind is that your printer interface may be doing its own conversions internally. If that is the case, you will need to alter the screen codes to look like the values shown on pages 178-179 of the manual (which are also the CBM printer codes) so that you send CBM codes to the interface instead of ASCII. Some interfaces have a switch setting called 'transparent' which stops any conversion taking place and will allow you to send true ASCII codes straight from the computer.

POKE 792,64 — Restore original value
To use these values in machine code just load the value to be stored into the accumulator (e.g. LDA $70) and then store in the correct address (e.g. STA $0326). Note the examples are shown in Hex, not decimal.

Disabled 128

We (the family) have a Commodore 128 and we wish to disable the run/stop and restore keys for an educational program in 128 mode.

While the solution in 64 mode is:-

POKE 809,255 Disable Run/Stop and Restore
POKE 788,52 Disable Run/Stop only

POKE 809,246 will restore these keys
POKE 788,49 will restore these keys

Our problem is, what is the solution in the 128 mode using basic 7 and machine code. We hope that you can assist us with some useful hints.

Brian Hasley, Aintree, Dublin.

The C128 uses exactly the same pairs of addresses for these functions as the C64, it is only the values you POKE in that are different. The following POKEs will give you all the combinations you want when using 128 mode:

POKE 806,112 — Disable STOP key only

POKE 808,100 — Disable RUN/STOP & RESTORE plus STOP key

POKE 792,100 — Disable RUN/STOP & RESTORE only (STOP will still break into the program using this)

POKE 806,110 — Restore original value

Random request

Could you please explain to me how you generate random numbers in machine code, and what machine code book(s) would you recommend?

Duncan Watts, Dyfed Wales

There are a number of ways of generating random numbers in machine code, but by far the easiest is to use the built-in ROM routines. These have the advantage that the bulk of the code is already written for you and gives similar results to the BASIC RND (X) calls. There are 2 main routines, one giving a repeatable sequence and the other giving a fairly non-predictable sequence. JSR $E086 is the former, while JSR $E092 is the latter. Both routines will leave the resulting number in the floating point accumulator (I FAC) 1 and also in addresses $39-143, again as a floating point number. If you wish to use a fixed seed value then this can be stored in addresses $39-143 before calling the routine for the first time. Alternatively JSR $E001 will give you a random start seed equivalent to RND (-1).

Note that to get an integer random number you will have to do some further processing. As for machine code books, it all depends on your current level of knowledge. If you want to learn about 6502 programming in general then look at books like Louth's 6502 Assembly Language Programming is excellent, although heavy going in places and not really for the novice. Alternatively, if you want to learn about using m/code on the C64 in particular, why not try Roelof West's book Programming the Commodore 64, which contains many worked m/code examples. If you are a complete novice then the Dr. Watson m/code tutor program and manual is very good.

Sprite animation

I own a Commodore 64, and like many others have found problems (due to the poor manual) in the graphics and sprite departments. Moving, Enlarging, and more than one solitary sprite on the screen is as far as I've got. I know this may sound basic but could you give me some help in these departments: 1. Animation of Sprites. 2. Multicolour Sprites. 3. Sprite collision.

Stuart Hopkinson, Chesterfield

Animation of sprites on the 64 is indeed a little bit of a pain. BASIC is really too slow if more than one or two sprites are involved, and so the only really useful way is to use m/code with IRQ interrupts. Approximately 50 times every second the computer stops what it is doing and goes away to update things from the clock, check the keyboard etc. It is possible to alter the address that the interrupt routine jumps to, and to add your own m/code routine to do any number of things like moving sprites, playing music etc. As long as your own code ends with a jump to the original interrupt address, then you can include your own routines as part of this automatic update.

I don't have room to go into full details of how to do it here, but as long as you follow one or two rules it is not too complicated. The IRQ Interrupt vector pointers are held in addresses 788 and 789. You must alter these to point to the address of your own m/code routine. But... preferably use m/code to alter these pointers and ensure you disable interrupts before changing them and then re-enable interrupts after they are changed.

Finally, end your own routine with a JMP to the original address ($EA31). As for multi-colour sprites, these have to be specially designed since instead of 24 x 21 pixels, in only half the horizontal resolution. The 'pairs' of pixels represent which of the 4 colours will be displayed as follows:

00 — background colour (transparent)
01 — Individual sprite colour
02 — Individual sprite colour
03 — Individual sprite colour
04 — Individual sprite colour
11 — Sprite colour #1

11 — Sprite colour #1 (register 38)
Note that the two sprite colours #0 and #1 are the same for all multi-coloured sprites. The individual colour is specified as for single colour sprites. In order to display a multi-colour sprite as such, the relevant bit of register 28 must be set to 1 (the registers are offsets from the start of the MOB register block at address 53248).

Finally, sprite collisions can be checked in BASIC by PEEKing register 30 (other sprites) or register 31 (screen data). If a 1 is found in the relevant bit position then a collision has occurred (at least 2 bits will be set in register 30 to show which sprites have collided). Note that reading the collision registers clears the whole register, so if more than one collision may have occurred, store the register contents before checking. If using an interrupt driven m/code movement routine then collisions can also be checked for at the same time, using the same registers as BASIC.

**Machine Gun**

I don't fully understand how the master register works in relation to more than 8 sprites moving on the one screen. Could you explain it better than the 'reference guide' and outline how to achieve the above. Also could you possibly write a program or outline the steps to make a sprite 'fire' a machine gun style. I have a C64 and I am writing in machine code. Please could you help me. Advice would be much appreciated.

Claran Coulter, Cavon, Ireland.

Unfortunately, I don't have the space to do it in detail, but the outline is as follows. The simplest way of getting 8 sprites is to split the screen in two and not allow sprites to cross the divide. This way you can have 8 sprites in the top half of the screen and a different 8 in the bottom half of the screen (to make it more flexible than this involves splitting the screen into 'zones' and is much more complex).

You start by setting Bit 0 in the Interrupt Enable Register (address 53274) with the following command: POKE 53274, PEEK (53274) OR 1. Then set the sprite interrupt registers (SIR) at address 53266 (low byte) and 53265 (high byte) to the sprite position value to give you the 'man' figures. While BASIC is not very good for moving 2 vertically grouped characters at a time, the use of a 'string variable' to include the necessary cursor movements does help. The following program builds the UDGS and then switches between left and right facing figures depending on the direction of travel, using the 'z' and 'x' keys. For more information on using UDGS on the C64, see my 'Tommy Special' in the Feb issue of CU.

**Drawing man**

I own a C16 and would like you to show me how to make these data statements to draw a man on the screen. I have also been struggling to make a man move left and right using the 'z' and 'x' keys. Please could you help me.

MAN FACING LEFT:
DATA = 6,14,78,38,30,7,14,22
DATA = 5,6,5,30,82,83,0

MAN FACING RIGHT:
DATA = 96,96,96,120,74,70,192,0
Nadeem Khaliq, Kigehly, W. Yorkshire.

The DATA statements are the values needed to set up 4 UDGS which are then displayed in pairs (vertically) to

brilliant type-ins but it simply does not work. Please could you show me how to use the joystick in this respect?

Justin de Freitas, Aylesbury, Bucks.

The way to move a sprite around the screen is to alter the X and Y co-ordinate registers located between addresses 53248 and 53264, depending on which of the 8 sprites you are controlling, remembering that you can only control one sprite at a time using the joystick. Assuming you are controlling Sprite 0 then you add or subtract 1 (or more, depending on the speed of movement required) to/from address 53248 for left and right movements (not forgetting to set the relevant bit of address 53264 for movement past the 255th column), and add or subtract the same amount to/from address 53249 for down and up movements. Combine that with a routine to read the joystick in BASIC and you get the following program lines (10-40: out define the sprite and set it to display in the centre of the screen). Press the FIRE button to toggle the speed of movement between 1 and 3.

10 PRINT' "<CLR>"': POKE2040,13
20 FOR S=0 TO 62: POKE 53249+S,255: NEXT S
30 V=53248: SP=1: REM SP IS SPEED

Palace Software and the serialization
of Maria Timaker (I could be a Radio
One DJ with "segways" like that — no,
no I couldn't be that thick). Steve
Brown, Palace game designer turned
his hand to designing Maria's costume
for the pounding photos on the game. He
evolved some stud photos to go on her
un, well you can guess (hint — there
was two) only to find that his know-
ledge of the female body was incorrect.
They wouldn't fit.

Two of the page to you! The
Irish element in CU is getting
so that won't stop me scraping
up the latest droppings from the floor of
the software world, not to mention the
milling, incredible comic strip oppo-
site continuing the adventures of the CU
team. Part Two next month, but quickly
before I forget all the things I was told
to forget...

- First up is Wild Bill Stealey, star of
our Play To Win supplement. At a press
conference for Microscope he told an
assembled group of hacks of an im-
pending launch based on some crum-
my anti-Commie excuse for a paper-
back called 'Red Dawn Rising'. The
scenario is based on a Soviet invasion
of Europe after the demise of nuclear
weapons all of which is as unlikely as my
Aunt Fanny defecting to Cuba with my
dental records. Somehow the conver-
sation turned to, wait for it 'Nam, where-
upon Stealey announced emotionally "I
lost some great buddies in South East
Asia and it damn near tore my heart
out." This had the assembled hacks
crying into their All American dinner
of burgers and spare ribs. As usual our
own Nick "Pinko" Kelly, that is, who
was on some anti-American diet con-
sisting of tomatoes and Complan. What
dirtbag!

Apart from humiliating his staff
Stealey was complaining bitterly about
his games being banned in Germany
(see buzz) where anything considered
too violent by the authorities gets
thrown out. If Stealey thinks he's on his
own in this he's mistaken. Games ban-
ned in Germany include Ocean's Ram-
bo and Green Barret. Elite's Commando
and even Ghosts and Goblins suffered
the same fate. I think Palace's Barbarian

Gossip

Hot shots
An amazing trilogy of action and adventure that follows your exploits as Galactic Commando in your struggle against the power hungry leaders of the Bungeling Empire and the search for their hidden treasure.

There's already one American sensation that's established itself as a firm UK favourite, now we've taken that same formula and crammed 7 succulent fillers into 2 appetising packages.

A superheroes delight of four action packed challenges set in the past, the present and the future.
